- VERY RARE. It was the first book devoted to Abyssinia, and by virtue of its intrinsic importance, it still ranks foremost in the literature of the subject.
136 leaves, with signatures A 2 leaves; B—R in eights; S 6 leaves. The foliation extends to leaf 130 which is marked 136 in consequence of a blunder by which the numeration was skipped between 14 and 23. Thus the first two leaves are not numbered, leaves 3-16 were numbered 1-14, leaves 17-130 are numbered 23-136, and leaves 131-136 are not numbered.
Alvarez accompanied a Portuguese embassy sent from India to Abyssinia in 1520-27.
- 23 ALVAREZ. Historia de las cosas de Etiopia, en la qual se euenta . . el estado . . del Emperador della (que es el que muchos an pensado ser el Preste Ivan) . . traduzido de Portugues en Castellano, por el Padre Fray Thomas de Padilla. - 25 ——— Historiale Description de l'Ethiopie . . 12mo. *olive morocco extra, gilt edges, by C. Smith* Anvers, chez Iehan Bellere, au Faucon. 1558 3 3 0
- No translator's name is given. It may have been Bellero himself, who signs the dedication. He published the book, but was not the actual printer, as we see that the licence was given to Plantin. There is some matter in this translation which is not in the original. For instance the text is preceded by a *Discours sur la Premiere et Seconde Lettre de Andre Corsal, Lettre de la Royne Helene, Voyage d'Andre Corsal, Preface de Ramusio*, and at the end we find annexed *Lettres du serenissime David Roy d'Ethiopie*. There are also six woodcut plans of Temples.

Colophon beneath: Cura & diligentia uiri celebris Magistri Antonii Ne- bris- sensis . . fuerunt hæ tres protono tarii Petri martyris decades Impressæ in contubernio Arnaldi Guillelmi in Illustri oppido quod vulgariter dicitur Alcala 1516. Small folio, red morocco, gilt edges, the arms of Charles Ashburnham on the sides, very large and fine copy</i> | 1516 | 22 | 10 | 0 |
| | After the completion of this book and the circulation of some portion of the edition, it was thought expedient by some one to add to it a reprint of the author's diplomatic mission to Cairo in 1505, and accordingly this piece in 16 leaves was appended to such of the copies as still remained in the publisher's hands. It does not however properly belong to the book, which is complete in its genuine form as above. | | | | |
| | Decade I had appeared in 1511; Decades II and III were not written by the author till 1514-16, and they appeared here for the first time. | | | | |

36* ——— the same, in a modern vellum binding 1521 2 16 0

Twenty-two leaves with signatures a—d in fours, e six leaves.

First Edition of the fourth Decade of Peter Martyr, although there is nothing in the book to specify that fact. The back of the title is occupied by an address from the printer, Adam Petri, to Joannes Catenæus Salediensis of Benacum, physician of the princess, praying him to present it to her. As the text begins on the second leaf with "Ex mearum decadū libellis in vulgus emissis colligere licet, Pater sancte . . ." Adam Petri ought to have seen that this was dedicated to the Pope, and was only the continuation of a book; but it does not seem to have struck him. How the transcript came into his hands we are unable to form an idea; but here is the fourth Decade in its first published state, nine years earlier than the author's own edition.

RARE: FIRST COMPLETE EDITION of the work in English. The Decades of Peter Martyr of Angheria were the first, and, for many years, the only History of the New World. Hence its important position in American literature; this being indeed in many respects the sole source of information concerning the discovery and conquest of America.

This excessively rare volume is a kind of Collection of Voyages, which is not only the first in the French language, but is also antecedent to all other collections of the kind, with the one exception of the famous *Poesi* (see FRACANZO). It consists of Peter Martyr's first three Decades reduced to French; followed by three Narrations, the first being a version of the *De Insulis noviter repertis* of Basle, 1521, which was the pirated first edition of Peter Martyr's fourth Decade; and the second and third are derived from the two letters of Cortes printed at Nürnberg in 1524.

The three Decades are dedicated to Charles Duc of Angouleme, and the three Narrations to his sister Marguerite de France. They were the children of Francis I, and at that time only ten and nine years old, respectively.

Two hundred and fifteen leaves, with signatures a—z and A—D in eighths (of which the last leaf was blank). The leaves are numbered 1-207 preceded by 8 unnumbered leaves.

Em Pariz . Anno M.DC.XLV (1645)

Only five books of the twelfth Decade were recovered by Manoel Fernandez de Villa-Real, who published them for the first time in 1645, at Paris, where he was then residing as Portuguese Consul and Minister. (He was rewarded seven years later by being put to death at an Auto-da-Fé for supposed Judaical heresy.)

A set similar to the second one above-mentioned was made up by Richard Heber at a cost of over £400.

| | Small 8vo. fine copy in green morocco, gilt edges 1586 | 75 | 0 | 0 |
| | Dedicated to Sir Walter Raleigh by Basanier, who says that he had with the help of "Monsieur Hakluit, homme certainement bien versé en l'histoire géographique" drawn the suppressed narrative of Laudonniere into light from the tomb in which it had been lying for twenty years. In the same dedication he refers to Raleigh's discovery of some islands and firm land between Florida and Cape Breton, named at present (in honour of your most virtuous and illustrious Queen) Virginea, where the Lord Greenville has established your colony. | | | |
| | One of the preliminary pieces of Latin verse, by I. Auratus, contains these lines:
Et quæ Reginæ nunc læta sub Elisabetæ
Auspiciis, Waltere Raleigh, tibi terra reperta
Nominè Virginia est, Regina à Virgine dicta | | | |
| | Another which is by "Richardus Hakluit Anglus" has—
Olim magnanimis concessit Florida Gallis,
VIRGINIA et sceptro nuper Elisa tuo. | | | |
| | This precedes by two years the date of Hariot's celebrated tract, and the Basanier above described is therefore THE FIRST PRINTED BOOK THAT CONTAINS THE NAME OF VIRGINIA. It is now extremely rare. | | | |
| | 8 preliminary leaves; 123 numbered leaves, and 1 unnumbered; with signatures a and A—P in eights, Q in four leaves. | | | |
| | This tragical story of the Huguenot attempt to found a colony in Florida forms the second narrative of De Bry's <i>Grand Voyages</i> . | | | |
| | Hakluyt who helped to produce this French original, brought out an English translation of it the following year. That English translation is very rare: a copy of it was sold at the recent Ashburnham sale, and was bought (against my competition) by an American agent for £390. | | | |

"Ces annotations," says Brasseur, "faites par un homme parfaitement au courant des hommes et des choses de son pays, en font un exemplaire non seulement précieux mais unique." There are 14 portraits inserted. Guadalajara admired the knowledge of Beristain, but not his character; for he speaks of him as "el hombre mas servil que parió madre."

A rare book which ought to find a place in as many American libraries as can acquire it, since it contains American maps; in English libraries because it celebrates the marriage of Mary and Philip, and in Spanish libraries because the epithalamium is in that language.

COLLATION: title and preliminaries, 4 leaves; followed by A—O in fours and P in three leaves. It is a scientific treatise on the globe, fantastically intermingled with mythological pieces of French verse. The name Darinel by which the author calls himself is taken from the Amadis romance, and he uses it on the title, and in dedicating his work to the Queen of Hungary, sister of Charles V and Governor of the Low Countries. But his real name appears in the colophon on the last page: fin de la sphere des deux Mondes, composée en François par Darinel pasteur des Amadis, & glosee par Gilles Boileau de Buillon. Imprimée en Anvers; par Iehan Richard, an Soliel d'or. l'an M.D.LV.

 The large woodcuts are as follows : 1 frontispiece; 2 Panorama of Venice, 65 inches by 11½, a little broken and patched; 3 View of Corfu; 4 Parentum; 5 Candia, 31 × 10 inches; 6 Modon, 31½ × 10½ inches; 7 Rhodes, patched and slightly defective, 31½ × 10½ inches; 8 View of Jerusalem and Map of the Holy Land, 48½ × 10½ inches, patched and slightly defective. Throughout the book and on the back of the Jerusalem view there are several smaller woodcuts. In the view of Venice two of the sections have been supplied from the Spires issue of the book, as we learn only from the type of the printed matter which occupies the back of those two sections, the woodblocks themselves being identical in both issues. The text relating to Venice is therefore partially missing.

CONTENTS :

GRAND VOYAGES in Latin, the COMPLETE SET of 13 PARTS, many in two states, with the Elenchus:—

Elenchus. Original Edition.

Part 1. Genuine first edition, but with title-page of the second issue of this edition. The plates are, according to Lord Crawford, of the first and second issues of the first edition mixed, but this would seem to be the case with every copy.

Part 2. First edition.

Part 3. Genuine first edition, and third edition.

Part 4. Two issues: Genuine first edition, with the exception of the first title, which is of the second issue; and second issue.

Part 5. Two editions: First edition, but the text of the second edition; and second edition with the page of Preface containing the portrait of Columbus both of the first and second editions.

Part 6. First edition.

Part 7. First and Second editions.

Part 8. Two editions: First edition, with the two small maps not always found; and second edition, with the rare plate of Adam and Eve on page 58, marked "Jo. Theodore de Bry fe." This copy contains the piece *Historiæ Antipodum*, etc., paged 129-160, which according to most bibliographers belongs to part IX.

Part 9. First edition; and second edition with the piece paged 129-60 at the end.

Parts 10, 11, 12, and 13. These last four parts were only published once, and in much smaller numbers than the others. Consequently they are very rare, and are most valuable acquisitions. A map of the Philippines in Part 10 is usually repeated in Part 11 likewise. Such is not the case here.

BRY'S COLLECTION OF VOYAGES, *continued*:—

£ s. d.

PETITS VOYAGES in Latin, the complete set of 12 Parts, some in two states:

Part 1. Two editions: the first with the very rare Appendix, and a duplicate set of plates; and the second.

Part 2. First and Second editions. The plates to the First are in duplicate.

Part 3. First edition, with the plates in duplicate. The map of Nova Zembla is not here on a separate leaf, but is engraved on the back of plate 58. In the duplicate set the back of this plate is blank. A map entitled "Delineatio cartæ trium navigationem per Batavos ad Septentrionalem plagam" in Latin and German), has been inserted from the German edition.

Part 4. Sole edition.

Part 5. Sole edition, with a duplicate set of plates.

Part 6. Sole edition.

Part 7. Sole edition, with the Swichard coat of arms on leaf of dedication. The plates are in duplicate.

Part 8. Sole edition, with the plates in duplicate. Plate 13 is in two states, with and without letterpress on the back.

Part 9. Sole edition.

Part 10. First edition, with a duplicate set of plates.

Parts 11 and 12. Sole editions.

Only one edition was issued of Parts 4-9, 11 and 12 of the "Petits Voyages."

There is probably no other copy so complete as this but the one in the library of the Duke of Devonshire.

- Lord Crawford, in the collation of his own copy which contains no maps, says that he has seen copies with maps, but regards them as not properly belonging to the work. However, the phrase on the title is enough—"mit nohtwendigen Landtaffeln." The Cabot Legends. 24 pp. with one illustration, 1897.
3 parts large 8vo. sd. Trans. of the Roy. Soc. of Canada, Ottawa, 1896-97 0 8 0
By virtue of its clear and ample demonstration, and of the great quantity of illustration (chiefly facsimiles from rare old maps) this is the weightiest work on the subject of the Cabot voyages which has ever appeared.
“In this erudite pamphlet Dr. Dawson recapitulates and reiterates his reasons for holding that the ‘landfall’ of John Cabot in his voyage of 1497 was on the east coast of Cape Breton. By some authorities, as is well known, it is contended that the place of Cabot’s disembarkation was in Newfoundland, while others will have it to have been on the shores of Labrador, and one of the latest utterances on the subject gives expression to the sceptical conclusion that the exact, and even the approximate, locality can never be determined. The theory here expressed is mainly founded on the fact that ‘the landfall of the voyage of John Cabot in 1497 was first definitely located in the year 1544’ in Cape Breton, or, in other words, that ‘the indication of the Cape Breton landfall rests upon the evidence of Sebastian Cabot, reduced to graphic form in his lifetime.’ This fact, long forgotten, was re-discovered in 1843 after other theories had replaced it, and Dr. Dawson does not pretend to have done anything ‘beyond vindicating the first—the original—and the almost contemporary statement.’ His theory is certainly supported with great learning and ingenuity, and the reader who desires to test his arguments and to master the general question will find plenty of helpful and valuable material in the numerous maps and charts, ancient and modern, with which his pages are illustrated.”—*The Glasgow Herald*, April 22, ’98.
- 191 THE CABOT ROLL . . The Customs Roll of the Port of Bristol 1496-1499 translated from the original MS. recently discovered at Westminster Abbey, with an introduction by Alfred E. Hudd, roy. folio, consisting of three leaves of Facsimile, three of transliteration, and three of translation, with one leaf of introduction Bristol, 1897 0 12 6
The value of the discovery consists in the proof it gives of a fact hitherto unknown, that John Cabot returned from his second voyage and was surviving in Bristol in 1499.

to it in his book. He even describes the method of making and enjoying cigars.

The initials on the titles are said to be those of Jean Clodoré, Secrétaire de Vaisseaux; the book is consequently attributed to "The Sieur de Clodoré" who is one of the principal figures in the narrative, the best Lieutenant of La Barre, and Governor of Martinique.—A map is said to have been issued with the book, but only a single copy is known which has it. | | | |

 The best critical book on the subject of the documents which exist for a history of the life and labours of Columbus. On p. 125 of Vol. I, there is a small error in the Latin text which has been pointed out elsewhere by the writer of this note. Lollis thinks that there must have been a lacuna in the Spanish texts which give *algodon filado* (line 15) as the Latin translation below (line 13, 14) has *bombicis* . . *quod ipsi iam noverant*. He has failed to observe that the last four words are a translation of the one word *filado*, and that he ought to have corrected *noverant* into *neverant*, as was done in Silber's edition of the Latin Columbus letter.
- 285 AUTOGRAFOS DE CRISTOBAL COLON y Papeles de America los publica La Duquesa de Berwick y de Alba, small folio, *with numerous facsimiles*; *sd.* *Madrid*, 1892 0 14 0

- 286 COLUMBUS. FIRST LETTER ANNOUNCING THE DISCOVERY OF AMERICA, in *Spanish*. Senor por que se que aureis plazer . . sm. folio, a facsimile reprint of the unique original in 2 leaves small folio with an English translation and preface; hf. morocco (1493) 1891 1 1 0
- 287 — the same, reissued in a reduced facsimile with translation, preface, and notes, sm. 4to. sd. 1893 0 2 6
The unique original, printed in Barcelona in 1493 in 2 leaves folio, is now in the Lenox library.
- 288 — Lettera in lingua Spagnuola . . a'Luis de Santangel . . riprodotta a fac-simile . . per cura di Gerolamo d'Adda, dall' unico esemplare . . nella Biblioteca Ambrosiana, 4to. 4 leaves of facsimile and XXXII pp. of introduction and notes Milano, 1866 1 16 0
This was reproduced from a unique second edition printed in 4 leaves 4to. no one knows where, but perhaps in Naples, or Rome. It is now in the Ambrosian library.
- 289 — FIRST LETTER, of 1493: a facsimile of the Ambrosian 4to. produced by means of types fabricated in imitation of those in the original. [S]enor por que se que aureis plazer de la grand victoria . . sm. 4to. 4 leaves [Rome or Naples, 1493] Italy, about 1892 25 0 0
Only 5 copies were printed of this typographical forgery. The intention was evidently to reproduce exactly the Ambrosian 4to., but the forgers were unable in several instances to make the text run line for line. Although the breadth of the lines is greater by the size of an "m," than that of the lines in the original several devices had to be practised so as to secure complete conformity at the beginnings and endings. One point may be noted for the guidance of others. In the *Nyma* on the last page, the original has the words "marauilla del mudo" while in the forgery this phrase appears by oversight as "merauilla del mudo" (me in the first word being an Italianisation, and the stroke omitted over u in the third word which indicated *mundo* instead of *mudo*). There were two other distinct forgeries of the same Epistle, in which perhaps the same mistake may not have been made.
- 290 — Primera Epistola del Almirante . . dando cuenta de su gran descubrimiento a D. Gabriel Sanchez . . Acompaña al texto original castellano el de la traduccion latina . . de 1493, y precede la noticia . . por el editor D. Genaro H. de Volafan [i.e. Varnhagen], 8vo. sd. Valencia, 1858 0 8 6
Privately printed from a MS. of the sixteenth century which may not have been derived from the printed folio (of Barcelona 1493) now in the Lenox library. This remains therefore a work of some intrinsic value. It contains an introduction, the two texts, notes and variants.
- 291 — Carta de Cristobal Colon enviado de Lisboa á Barcelona en Marzo de 1493. Nueva edicion critica . . por el Sendonimo de Valencia [i.e. Varnhagen], 12mo. bds. Viena, 1869 1 2 0
- 292 — the same, green morocco extra, uncut edges ib. 1869 1 12 0

- 294 — the same, reproduced in facsimile, with a bibliographical introduction, sm. 4to. sd. 1893 0 1 3
- 295 — the same text, photolithograph of an edition printed at Paris about 1493 (Archbishop Laud's copy in the Bodleian), with an introductory note by E. W. B. Nicholson, sm. 4to. sd. Oxford, about 1895 0 1 0

Bishop Giustiniani who edited this book has inserted as a marginal note to Psalm XIX, an account of the first voyage of Columbus, which is continued over five pages.

FIRST EDITION; RARE. One seldom sees the first edition of this celebrated book. The MS. original in Spanish which has never been found was in 1571 in the possession of Baliano di Fornari, to whom the dedication is addressed; and it seems to have been intended to print it after the issue of the translation. But this was never done.

EXTREMELY RARE FIRST EDITION. It is a book of grand and sumptuous appearance, printed in very large Gothic type with 32 lines to the page. This work revolutionised the science of Navigation, and was the first to point out the deflection of the needle. The date at which it was written appears in some of the passages of the earlier part of the book as 1545, but a few years probably elapsed before the author could finish it and get it ready for the press.
The instructions for map-making are not the least interesting part of the text, and would be found useful by many persons who are unable to understand the principle of the wind-roses and rhumb-lines which cover the surface of old hydrographic charts. But even here the acute intelligence of Cortes indicated the defects of the plane system long before Mercator.

A Græco-Egyptian monk who was also a trader familiar with Abyssinia and the shores of the Red Sea, and visited India. This book is a description of the world as known to him, and is full of curious particulars valuable as aids to modern criticism. He acted and wrote in the sixth century, and has been called "the first of the medieval Geographers" or "the last of the old Christian Geographers."
His work was first published in extracts by Thevenot.

COLLATION: A, B, C in sixes (the so-called Mappemonde forming the two inner leaves of C) and D in four leaves; a in eight; b and c in fours; d in eight; e and f in fours.

The date—29 August 1507—shows that this is the second issue (the first having appeared on April 25) of the famous book which invented the word “America” and stamped it on the New World for all time. The Gymnasium of St. Dié was a collegiate institution, which started a press for itself in 1507. The combination of letters in the mark above mentioned, represent: S.D., St. Dié; G L, Gauthier Lud; M I, Martinus Ilacomilus (Hylacomylus = Waltzemüller). These two men, and Nicolas Lud (N L), were members of the Gymnasium. Hylacomylus was the author of the above book, and he added to it the four Voyages of Vespucci, translated into Latin from a French version of the Italian original.

On the back of the globe, which has been called a Mappemonde, there is a statement in 15 lines, on the subject of the proposed terrestrial globe and flat world-map which it was intended to produce.

On the reverse of leaf Biii it is said that *the greatest part of the still unknown land lately discovered by Americus Vesputius is inhabitable. On the obverse of Ci, the fourth part of the world, which since Americus discovered it, may be called Amerige (as it were the land of Americus) or America, is in the sixth climate.*

On the back of C 5 we find it said: *Now however those parts are more widely investigated, and another quarter has been discovered by Americus Vesputius (as will be heard in the sequel) and I do not see how any one can lawfully forbid that it should be named, after its sagacious and ingenious discoverer, Amerige (as it were Americo's land) or America. In the verses of Ringmann (Philesius) on the back of the second A 1, the geographical name Amerige is added by the side of the lines referring to Spanish and Portuguese discovery.*

The 34 leaves of which this edition consists bear signatures, thus : A and B in four, C 8 leaves (of which the double leaf containing the so-called Mappemonde, forms two) ; D 4, E 6, and F 8.—The particular value of the edition of 1509 lies in the circumstance that it was the first to reveal the name of the compiler and editor of this famous geographical work—the *Cosmographia Introductio*. In the editions of 1507 his personality had been concealed under the vague appellation of the *Gymnasium Vosagense*. But now he claimed his rights as author, and turned the *we* into the *I*, besides making some other small modifications. This copy is bound up with CARBEN (Victor) de Vita et Moribus Iudeorum. Paris, 1511 ; Clichtoveus de laudibus Sci Ludovici et Sanctæ Cecilie. Paris, 1516—The autograph of Baluze appears at the beginning of the volume.

- 342 COTTON. *Abel being Dead yet speaketh*; OR, THE LIFE & DEATH Of that deservedly Famous Man of GOD, Mr. John Cotton, Late TEACHER of the Church of CHRIST, at BOSTON in NEW-ENGLAND. By JOHN NORTON, Teacher of the same Church . . LONDON, Printed by Tho. Newcomb for Lodowick Lloyd . . 1658. Small 4to. *fine copy in black morocco extra, gilt edges* 1658 6 15 0

51 pp. of text including the title, and 5 pp. of a Catalogue of books printed by Lodowick Lloyd.

This is a rare book of which there was no copy in the Barlow library. Cotton's name ranks deservedly high in the annals of New England, but the two poems which he left in MS. and which are printed in this volume, are not the choicest flowers of New English literature.

The inscription "Rowland Cotton his Book" at the top of the second leaf may have been written by a relative of the Saint. John Cotton was born at Derby in 1585.

FIRST EDITION; RARE. This is one of the most entertaining, amusing, and simple-minded records of its kind. There is little waste of literary effort; in fact, the narrator was plainly an uneducated man, but he wrote with a clearness and directness of language which carries conviction as to his perfect sincerity, and presents more vivid pictures than could have been drawn by an author of far loftier rank in literature. Those who are interested in the history of the Mogul Empire and of Persia at the beginning of the seventeenth century will find valuable pieces of information in Coverte. The period covered is 1608-11.

After a journey beyond Chicagou to Wisconsin, he returned to Montreal, Niagara, and Frontenac, and was thence sent to Lake Champlain where he arrived in 1735. The following year he returned to Quebec, and thence set out for France, but was wrecked at the mouth of the St. Laurence on the island of Anticosti. As supplementary matter were added in Vol. III: Lionel Wafer's New Voyage and Description of the Isthmus of America . . with a map and three plates, 1729. 394 DOBRIZHOFFER (Martin) An Account of the Abipones, an equestrian people of Paraguay, from the Latin [by Sara Coleridge]. 3 vols. 8vo. *bd.* 1822

The Abipones are the people of the great plains lying west of the Paraguay river, called the Gran Chaco.—Dobrizhoffer was one of the Jesuits who civilized Paraguay and who were expelled from it by the Spanish monarch a few years before the date at which he printed his Latin text in Vienna (1784). He had lived for eighteen years in Paraguay. This translation was made by the daughter of the poet Coleridge.

The MS. was certainly not the work of "a dirty-minded German boy", but of an Indian who had received some education in a Moravian school. The nature of the designs will render this book one of permanent commercial value.

396 DONKIN (Major) Military Collections and Remarks . . New-York . . M,DCC,LXX,VII. 8vo. *UNCUT, bound with the original blue-paper wrappers in hf. morocco* 1777

Barlow's copy, with cut edges, fetched 35 dollars.

Published by subscription for the purpose of raising a fund towards the relief of the widows and children left by British soldiers slain in "the present unnatural rebellion." £290 was the outcome after the payment of all expenses. The text is diversified with occasional abuse of the rebels, and remarks upon various actions during the conflict. It is therefore more interesting than a book of purely military science, but it is still worth reading as a set of notes upon military duties.

On p. 190 a footnote is cut out; which seems to be the case with all the known copies but one only. It was a proposition to inoculate the Americans with the small-pox.

- The author of the three important treatises which constitute this work was born in Mexico in 1538, son of a Spanish father and a Mexican mother. The publication,

commenced by Ramirez, was interrupted after the appearance of Vol. I, by the fall of Maximilian, and was only resumed and completed several years later.

From the nature of the composition, and the writer's exceptional possession of sources of information, closed to others,—Fray Diego Duran's history must take a foremost place among books of its kind. It is an indispensable companion to Sahagun, Torquemada, and Ixtlilxochitl.

This is the Tijdschrift of the Koninklijk Instituut voor de Taal Land en Volkenkunde van Nederlandsch Indie. It is arranged in Series, of which the First has 4 vols., the Second 8, the Third 11, the Fourth 10, the Fifth 10, and the Sixth vols. I-III.
— the four collections (Nos. 409-412), if taken together, will be sold for £100. But if not so disposed of within three months, the articles will be sold separately at the prices affixed.
There is hardly any library, public or private, in England that can boast the possession of all the above valuable periodicals. They are absolutely necessary for the study of scientific men who cannot afford to let even the Dutch language exclude them from a whole world of knowledge. But, unfortunately, sets are very scarce, and the opportunities of gathering them are very few.

This is the book of Barents' three Voyages to the Arctic Regions (1594, 1595, 1596), in the last of which he died; and has been known since 1598 under the name of Gerrit de Veer, who was in the last voyage, and wrote the Dutch narrative. VERY RARE. This is a direct translation by W. PHILLIP (in which form the name is given at foot of the dedication to Sir James Scudamore) from the Dutch original which appears in a Latin paraphrase in Part 3 of De Bry's *Petits Voyages*.

This was the first Voyage of the Dutch to India, and is known under the name of Cornelis Houtman, who sailed in the chief of the four vessels. The Dutch editor was Bernardt Langhenez, whose name is attached to the dedication addressed to the authorities of Middelburgh.

The English translation is so rare that I can find no description of any other copy than this and the two in the British Museum.

of the Northwest Passage, addressed to the Countess of Warwick, by whom Frobisher was employed. 7 leaves.

Reports on China and Japan (chiefly drawn from the Jesuit Letters). 24 leaves.

Accounts of Persia (chiefly from information supplied by English merchants in 1561-68). 16 leaves.

A brief Rehearsal of the contents of Peter Martyr's Decades 1-3. 12 leaves.

Abridgment by Willes of the Decades V—VIII.

Otherwise the contents of the work agree with those of the 1555 edition, save that some extracts from Corsali, Cadamasto, and Biringuccio were omitted, as well as a translation of Vespucci's Latin letter.

Thus the volume comprises: Peter Martyr, Decades 1-4; Oviedo's Sumario; Notable Things (from Gomara); the Instructions and Reports mentioned above; Of the North East Frostie Seas, with Edward VI's letter; Two English Voyages to Guinea; Accounts of Persia, and Vartema's Travels, as mentioned above; Prices and weights and measures in the east: Magellan's Voyage; Strife for the Moluccas, out of Gomara; the Papal Bull of 1493; Conquest of Mexico from the Decades V—VIII, mentioned above. Besides these, there are a preliminary Epistle and a Preface by Willes, as well as Certain Preambles by Eden which have considerable interest.

First Edition of a book which was not only a new and important treatise upon Geography in general, but also was of extraordinary interest and value as an original contribution to the history of the New World. It was the second publication in the Spanish language on the subject of the Indies, the first being the letter of Columbus which is now in the Lenox library.

76 leaves, of which the last was a blank, cut away here. The signatures are: a, b, fourteen leaves each; c—h in eights.

The peculiar story which begins on the reverse of leaf 72 must have helped to make the work obnoxious to all civil and religious authorities, and consequently rare. The author in his official capacity required the submission of two Venezuela caciques, informing them that the King of Spain was their master, the land having been bestowed upon him by the Pope, who was lord of the Universe as God's lieutenant. They agreed with him that there was only one God, and that he was Lord of the Universe, but as for the Pope's lieutenancy, and his gift to the King of Spain, the Pope must have been drunk when he made a present of what was not his to give, and the King who asked and accepted such a gift was an idiot.

Oviedo went to the Indies in 1513 as inspector of the gold-works, and returned upon business to Spain in 1525, leaving his wife and children in one of the grand stone houses of which he describes San Domingo as built. Before he returned he gave this work to the press as earnest of the larger work which he had in MS. in San Domingo, and which he brought to Spain eight years later to get printed. See below.

Oviedo is one of the chief authorities for the history of the Spanish Conquest of America. Born in 1478, he died in Spain in 1557, after having spent about forty years of his life in an important official position in the New World.

This edition of his Chronicle, printed in 1547, can hardly be regarded as equal in value to the one of 1535, notwithstanding the words on the title; but the Appendix is the First Edition of the celebrated narrative of Xerez.

This twentieth book of his Historia was the first book of his Segunda Parte which was to have ended with a thirty-eighth book, and to have been succeeded by a Tercera Parte in twelve books. But at the end of this volume it is stated *Nose imprimio mas desta obra porque murio el autor.* He was residing in Valladolid, and had evidently sent this part to the press himself.

The complete work was printed for the first time in 1851-55.

A work never published before, written by Oviedo in his old age, in San Domingo, to record the lives and acts of the famous men he had known in his youth. It is full of entertaining gossip, including remarks upon some of the Conquistadores, and was finished in 1556. He then brought the MS. to Spain for publication, being in his eightieth year, but died before any part of it was begun.

This first part ends with the year 1563; and nothing more was published by the author.

In the address *Al Lector* he admits ingenuously that his chief source of information was a MS. memoir left by Gonçalo Ximenez de Quesada. His account of Lope de Aguirre, whose deeds are told in one of the Hakluyt Society volumes, is full of interest.

This Collection, of which the preface is signed by Feyrabend, consists of two parts. In the first part there are the first five Portuguese expeditions to India (1497-1504) under Da Gama, Cabral, Da Nova, Da Gama, and Suarez de Meneses. The second part contains the Adventures of Schmidel who went out with the Spaniards in 1534, reached the Plata in 1535, helped to build Buenos Ayres, and after many experiences on and about the Parana, succeeded in returning to Antwerp in 1554. This is followed by Hans Staden's adventures (1547-55) in Portuguese and Spanish services—chiefly in Brazil. In the edition published a few years ago by the Hakluyt Society, the editor dwells upon the great intrinsic value of Foxe's text and map, and upon the rarity of the book when complete. Henceforward the North-west Fox must rank among the chief of the early English books relating to the Hudson's Bay region; and the value of the original edition ought to increase proportionately.

COLLATION: 6 preliminary leaves and pp. 1-168; four pages of which the first three are marked 172, 170, 171; and pp. 169-(272); with signatures A in 4, A in 2, B—T in fours, V 4 leaves with two other leaves marked u 3 and u 2 inserted between V 2 and V 3; X, Y, Z, and Aa—Ii in fours; and Kk 2 leaves. The leaves u 3 and u 2, were evidently printed at the end of the book to supply a deficiency which would have made V four instead of six leaves.

Some of the accounts of anterior voyages given by Foxe are not to be found elsewhere; including the important expedition of Sir Thomas Button in 1612.

Small 4to. fine copy in brown morocco, gilt edges, by Hardy-Mennil 1507 225 0 0

This rare and celebrated volume was the precursor of all the Collections of Voyages.

According to Mr. HARRISSE, the copies in American libraries are all of the second issue,—that is of the issue which contains 143 chapters; which omits the specification of privilege for ten years in the colophon; and which only came out in 1508, notwithstanding its retention of 1507 in the imprint.

The above has 142 chapters, likewise the prohibition against re-printers,—and is consequently the first edition of the book.

The best proof that copies with 143 chapters came out in 1508 at the earliest is this: that the Latin translation ("Itinerarium Portugalensium") printed in 1508 contains only the 142 chapters of the Paesi of 1507.

The text of Cabral's voyage, whoever its author was—perhaps Vaz de Caminha—was printed here for the first time, and differs *toto cælo* from the brief sketch contained in the Letter of Manoel to Fernando,

which was printed in 1505 at Rome, and which Mr. Harrissee confounds it with. It occupies no less than 40 pp. of the *Paesi* (chapters 63-78) being the greater part of *Libro II.*—The other contents of the volume are—

Books I—II. Voyages of Cadamosto and Pedro de Cintra along the West Coast of Africa, 1454-63.

These had never been published before and occupy here capp. 1-50.

Book II. Voyage of Vasco da Gama round the Cape to India, 1497-1500.

Never published before. It occupies capp. 51-62.

Books II—III. Voyage of Cabral to India, with the discovery of Brazil, 1500-1501.

Never published before. It occupies capp. 63-83.

Book IV. Abridgment of Peter Martyr's yet unpublished first Decade, giving an account of Columbus, Alonso Niño, and Pinzon, 1492-1500.

This had already been printed in the *Libretto* at Venice in 1504. Here it occupies chapters 84-113.

Book V. Vespucci's Voyage of 1501-2.

This occupies chapters 114-124.

This was a retranslation into Italian of the single Letter already printed in Latin.

Book VI. Five letters from Venetians in Lisbon, dated 1501-2-3, giving accounts of Portuguese expeditions to the East and the West (*Corte-Real* included). Chapters 125-128.

Never published before.

Book VI. Accounts of India, by Joseph of Cranganor (who had been brought home to Europe by Cabral in 1501). Chapters 129-143.

Never published before.

This list of contents offers a curious contrast to Mr. Harrissee's extraordinary statement that the *Paesi* "was composed of accounts already in print at the time." He has no doubt altered his opinion since 1872.

Small 4to. Roman letter, 84 leaves, 40 lines to the page, with woodcut initials; the last two leaves in facsimile; crimson morocco extra, gilt edges, by Lortic

1508 25 0 0

This edition, like the *Princeps* of 1507, and the Latin translation, consists of 142 chapters; and must therefore have preceded the *Vicenza* reissue with 143 chapters. It is of excessive rarity; as may be imagined from the fact that I have never had a copy except this one; and that Harrissee was unable to specify more than two copies, in one of which the title was a facsimile. Moreover, he describes the book as consisting of 79 unnumbered leaves. The copies he saw wanted probably the four preliminary leaves, although in one of them a facsimile title was inserted, which was a great drawback, as one of the chief merits of the book is its fine woodcut on the title.

Inserted in the beginning of the volume is an original Passport or Licence on a strip of vellum, written and signed by "Antonius Vespuccius Cancell' Exu'act"; giving to Laurentius de Cambis, son of Antonius Bernardus de Cambis, the right, as *Gonfalonarius vexilli unicorni* of Florence, to pass to and fro with his company, with or without lights, and with or without arms, throughout the city and its suburbs, for four months, namely from 7 January 1513(-14) to 7 May 1514.

There is no difference between the editions of 1507 and 1508, except that some small corrections here and there are made in the latter, where there had been obvious faults easily remedied. This included the transfer of cap. 128 to its proper place: it had previously been put between 125 and 126. The note of erratum on this subject which occupies the last three lines of 125*a* in the 1507 edition (beginning "Item sappie che in nel. vi. lib. p incuria . .") is consequently suppressed.

Milan edition of 1512—see *post* under VESPUCCI.

This Latin translation of the *Paesi* was made by Archangelo Madrigano, a Cistercian monk, from the first issue of the Vicenza book, as appears from the circumstance that the translation did not even transpose cap. 128 to its proper place, but simply called attention to the error in his *Ad lectorem*. (In the Italian edition published a few months later and described above, the transposition was duly made.)

The first compiler's name appears in the form of Montaboldus Francanus.

COLLATION: title and introductory matter, 8 leaves; index, 2 leaves; text 88 numbered leaves (the last two numbered erroneously as 77 and 78). The signatures are A 8 leaves; a 2; and B—N, of which D, G, I and N are in sixes, the rest in eights. The Index is frequently wanting: it seems to have been printed for insertion in copies after the book had already gone into circulation.

The main contents of the book are Peter Martyr's fourth Decade, and the Second and Third Letters of Cortes. But the special feature of importance is the two Epistles which are found on leaves 76 and 77, and which were printed here for the first time. The one is an Epistle from Martin de Valencia dated 12 June 1531; the other is by Bishop Zumarraga; both from Mexico, and giving an account of the educational work of the Franciscans among the natives.

THE MOST CELEBRATED PRODUCTION OF BENJAMIN FRANKLIN'S PRESS.

The translation was made in 1734 by Chief Justice James Logan, who was the second of the three famous worthies of Pennsylvania: Penn, Logan, Franklin. Copies were circulated in manuscript among friends, and Franklin got one, which he determined to give to the press. In his preface he calls the book "this first translation of a *Classic* in this *Western World*," and he wishes it may prove "a happy omen that Philadelphia shall become the seat of the *American Muses*."

| One of the rarest of Hakluyt's books; so rare indeed that the Hakluyt Society was obliged to make use of a transcript in publishing the edition which it produced in 1862; just as Hakluyt himself had been unable to get a sight of the Portuguese original printed at Lisbon in 1563. If he had succeeded in getting access to that volume, he would probably have done no more than correct the visible errors of the English MS. (lying in his hands from about 1588); but since he found that course impracticable, he did better, and carefully investigated the whole of the matter, leaving us a work which is nearly as much Hakluyt's as Galvao's. He describes the treatise as one which "though small in bulke, containeth so much rare and profitable matter, as I know not where to seeke the like . . . it was first done into our language by some honest and well affected marchant of our nation whose name by no meanes I could attaine vnto." | | | | |

Although this has only to do with the Western coasts of Europe, it was an
important Mariner's Guide in its time, and is still one of the most celebrated books on
Navigation. The cuts seem to be unchanged from the old designs made by Garcie
about 1480. The book was printed for the first time about 1520.

The voyager left Goa for Portugal 30 December, 1605. His ship and its partner were wrecked on the coast of Madagascar. The Friars landed in Africa, then in another ship went northwards towards the Red Sea, landed in Socotra and Ormuz, went through Persia, saw the ruins of Nineveh and Babylon, got to Aleppo by land, and sailed thence to Cyprus which he reached in February, 1607.

- In the latter two copies the fourth volume is of the augmented and improved edition which heightens considerably the value of the book. The Greek works included in the collection are as follows: I. The Periplus of Hanno (Africa); Scylax (Mediterranean); Agatharchides (Red Sea); Arrian (Euxine, and Red Sea); Nearchus (Indian Ocean); Marcian (Atlantic Ocean, and Indian Ocean); of the Euxine (anonymous); fragments of Artemidorus. II. Dicaearchus, description of Greece; Scymnus, description of the world; Agathemerus, Geography; Plutarch on Rivers and Mountains; Extracts from Strabo. III. Extracts from Dionysius Byzantius (Bosphorus); Periplus of the Euxine (anonymous); Extracts from Ptolemy. (In this volume are added extracts from the Arabic writers.) IV. Dionysii Periegesis, with various supplements.
- There is sometimes added to this Collection, by way of Supplement (1) a ridiculous book printed at Oxford in 1704, which from its title would appear to be an edition of Dionysius in Greek and Latin, with an Appendix. It is, however, nothing more than a text fabricated by the supposed editor, who has rewritten the greater part of the old Greek text, for the purpose of transforming Dionysius into a modern teacher of modern Geography.

Small 4to. 34 leaves, with an engraved folding map of Guiana; beautiful copy in red morocco extra, gilt edges

1676 10 0 0

The address to the Reader is signed N.N.; the four leaves of Conditions imposed by the State upon every emigrant is signed Simon van Beaumont; and it is under that name that Franz Muller and others have described the book. He had probably however no more to do with it than as a Government Secretary signing the ordinance which accompanied its publication. The description of the country is of historical and general character. The map is marked "J. Lux fec." The title bears an engraved view of a part of the coast.

- 599 — EEN Vertoogh van de considerabele COLONIE By de Edele Groot Mog. Heeren Staten . . uytgeset op de vaste Kust van AMERICA. . . . IN 's GRAVENHAGE, By Jacobus Scheltus . . 1676

Small 4to. 35 leaves; fine copy in purple morocco extra, gilt edges

1676 6 16 6

This begins with the same preliminary Conditions signed by Beaumont as in the Beschrijvinge. Then follows a different description of Guiana, in which the productions of the country are dealt with in special detail, as though a different set of immigrants were considered from those to whom the Amsterdam book was addressed.

This little collection of Voyages—the first book published by Richard Hakluyt—was expanded seven years later into a thick folio volume, and the result was to make it so rare that only two perfect copies are now in existence (both in the British Museum); and only four which are not perfect. Of these four, the Bodleian copy has only Lok's map, the two in America and this one have neither map (they are supplied here in facsimile). Another copy which was in existence a year ago and which had only one map in facsimile, has since been destroyed by fire.

The third and last . . . the vaste and new world of America . . . Whereunto is added the last most renowned English Navigation round about the whole Globe of the Earth. By Richard Hakluyt Master of Artes . . . Imprinted at London by GEORGE BISHOP and RALPH NEWBERIE . . . 1589*

Small folio, bound

1589 17 10 0

With the six unnumbered leaves of Drake's Voyage round the World between pp. 643 and 644. With this piece Hakluyt says in the preface that he had taken more than ordinarie paines, and he was therefore grieved to be obliged to omit it because some one else was preparing the narrative for publication. He must however have put it into type for some copies after the book had been finished.—The second and improved issue of Sir Jerome Bowes' Relation of Russia is the one given here.

- 609 — another copy, also comprising *Drake's Voyage*; 6 leaves, and the second issue of Sir Jerome Bowes, the title slightly soiled, a facsimile of the famous map of 1600 added; red morocco extra, by Bedford 1589 18 18 0

- 610 — THE PRINCIPAL NAVIGATIONS, VOYAGES, TRAFFIQUES AND DISCOVERIES OF the *English Nation*, made by Sea or ouerland . . . at any time within the compasse of these 1600 years: . . . By RICHARD HAKLUYT, Preacher and sometime Student of Christ-Church in Oxford . . . 3 vols. small folio, *ruscia* 1599-99-1600 27 0 0

With the seven suppressed leaves of the Voyage to Cadiz in 1596 (pp. 607-619 of Vol. I.): A facsimile of the famous map of 1600 is added. It is by rare good luck that the Voyage to Cadiz was inserted, as it does not really belong to the 1599 issue of Vol. I.

On the title-page of the 1598 issue of Vol. I, the Cadiz voyage was announced, but the leaves containing it were suppressed by authority. In the issue of 1599, it was not intended to appear and all mention of it is omitted from the title. It was therefore absent from the genuine issue of 1599, but on the other hand some few copies of the later issue were in the publisher's hands long enough to receive Wright's celebrated map, usually attributed to Emeric Mollineux.—A copy of Hakluyt's voyages with that map is one of the rarest treasures of old geographical literature.

- 611 VIRGINIA RICHLY VALUED. *Fol. 1 blank except that it bears the signature A within the arch of a woodcut ornament. Fol. 2, title: VIRGINIA | richly valued, | By the description of the maine land of | Florida, her next neighbour: | Out of the foure yeeres continuall trauell and discouerie, | . . . of | Don Ferdinando de Soto . . . | Sixth line below this: Written by a Portugall gentleman of Elvas, employed in | all the action, and translated out of Portugese | by RICHARD HAKLUYT . | AT LONDON | Printed by FELIX KYNGSTON for Matthew Lownes, | and are to be sold . . . | . . . | 1609. Fol. 95 reverse: . . . FINIS.*

Small 4to. fine copy in crimson morocco extra, gilt edges, by Bedford 1609 42 0 0

A 5 leaves, B—Z in fours, Aa 2 leaves—95 leaves, of which the first five are unnumbered, the other 90 are paged 1—80. In signature A, the third and fourth leaves are marked A 2 and A 3, which would lead most people to regard the title as A1. But the leaf marked A which precedes the title shows that the preliminary leaves must have been intended to run to six, and finally a blank was cut away.

There are six pages in Hakluyt's Epistle dedicatory, in which he advises the Councillors for Virginia how to handle the natives—"if gentle polishing will not serve, then we shall not want hammerours and rough masons enow, I meane our old soldiours trained up in the Netherlands, to square and prepare them to our preachers' hands."

This is one of the rare Supplements to Hakluyt's collection of Voyages which are so difficult to find in good and perfect copies. There is none in Mr. RUTH's library, and Mr. Hazlitt was unable to describe any copy outside of the British Museum.

The name of the gentleman of Elvas is not known. The book is sometimes catalogued under the name of Soto.

EXCESSIVELY RARE, whether perfect or imperfect. This copy is quite perfect, and only three or four others are believed to exist in the same condition. The work of Hernandez had not yet been printed, but the Latin MS. was in the hands of Ximenez who compiled the above volume partly from his predecessor, and partly from his own experience.

The book consists of 206 leaves; with signatures ¶, A-Z, Aa-Zz, Aaa-Ddd, in fours, and Eee in two leaves. The body of the book is foliated, but the numeration is full of errors. This is the copy which formerly belonged to Father Fischer.

	The first part is a compendium of Peter Martyr's Decades 1-3 (printed 1516); the second of Oviedo's Natural Historia (printed at Toledo in 1526); and the third is from			

the *Conquista del Peru* printed anonymously at Seville in 1534 (a different work from that of Xerez).

The printer's name is nowhere given, but a comparison with other books will show that this collection was printed by or for the brothers Nicolini da Sabbio. The larger map is so rare that it is believed only two copies are extant.

| | James, a Bristol man of Welsh origin, started in May 1631, and returned in September 1632, having met Luke Foxe somewhere in Button's Bay. His record is full of hardships and perils, and is said to have supplied Coleridge with some of the machinery of his Ancient Mariner. As a good Welshman, James named the region south of Hudson's Bay <i>New South Wales</i> , while Foxe who was from Hull called it <i>New Yorkshire</i> (—see ante North West Fox). | | | |

EXTREMELY RARE. It seems to be THE FIRST PRINTED COLLECTION OF JESUIT RELATIONS. One might imagine that the same letters had been printed first at Coimbra in Portuguese, but the preface does not allow of such an hypothesis. The dedication is to the Duque de Cesa by Juan de Cordova, Abbat of Rute and Dean of Cordova, who says he had recently made the acquaintance of some Jesuits, brought to Cordova to found an institution there, and that though he had been prepossessed against them, they overcame his dislike. He now, therefore, wished to make the world acquainted with their goodness by printing some of the letters which had arrived from the East. The first Carta is from Master Francis (Xavier), recounting, in 23 pp. his work in Japan from 1549, and is dated from Couchin, whither he had returned 29 January 1552. Carta 2 is from Francisco Perez from Malaca 1550. Carta 3 from Juan de Abera at Maluco, 5 Febr., 1549. 4 Padre Gaspar from Ormuz 10 December 1549, 34 pp. 5 Gaspar Francisco from Ormuz 25 Nov. 1550. 6 Enrique Enriquez from Cochín 19 Jan. 1551, 14 pp. Cartas 7-14 are eight letters from Corsica and Genoa 1553. Carta 15 is from Goa 23 December 1554: it relates the death of Master Francis (Xavier) and the sending of Fernan Mendez [Pinto] as Portuguese minister to Japan. Carta 16 is from Pinto himself relating how he had joined the Jesuits and was going to work for them in Japan. Dated Malaca 5 April 1554.

This Principio ends on fol. 6b, and is immediately succeeded by the Prologo del autor. On fol. 7 begins the text of the History, which is thenceforward foliated. Leaves 72-86 contain what is THE SECOND COLLECTIVE EDITION OF JESUIT RELATIONS. There are eight letters in it; the first from Melchior Nuñez, 1554, informs Ignatius Loyola of the death of Francis Xavier; the second from Goa, 1554, treats of Japan; in the third Melchior, Nuñez writes from Malacca, 1554; the fifth is from Pinto from Malaca 5 December 1554 [he is simply miscalled Hernâdez]; the sixth Information from Malacca about China, from one who had been for six years prisoner there; the seventh is from Hermano Joseph in Brazil; and the eighth also from Brazil written by Juan de Azpilcueta in Puerto Seguro in 1555. None of these is a duplicate of any in No. 699.

from Japan since 1548, and print them in a volume ; and that the Spanish language had been chosen for that purpose, because of its being generally known throughout Europe. He calls Japan "some oriental islands of white people, now newly discovered by the Portuguese." The text begins with a letter from Pablo Japon to Ignatius Loyola, written from Goa in November, 1548.

The number of letters is very considerable (forty odd), and comprises two by Francis Xavier. They are all from, or about Japan, and include four which appeared in the Coimbra collection of 1562. The value of the book of 1564-65, is great, because of its going back to the beginning, and thus forming the first entire collection of Letters from Japan.

 Best edition of a work of permanent historical value and importance. It is the monument of the Jesuits; and shows more clearly than any special history could do the loftiness of their aims, the self-sacrificing energy with which they pursued their object, and the greatness of their achievements. In zeal, in labour, and in accomplishment, no other missionaries can be compared with them except the early propagators of Christianity.

This is a book of excessive rarity, in any condition. It was called the Second
Voyage because Raleigh's own, performed in 1595, but only printed in the same year
as this, was the First. Keymis had an early and tragic end; but his book forms part
of the brilliant history of English seamanship in the days of Elizabeth.

32 leaves, with signatures A and A—E in fours, F in eight leaves. A large wood-
cut of Raleigh's arms occupies the reverse of the title, and faces the dedication to him.
This dedication ends on the obverse of the third leaf; on the reverse and on the three
succeeding pages is an address to the Faouurers of the Voyage for Guiana. On the
reverse of leaf 5 begins a Carmen Epicum in English, which ends on the obverse of 8
with the signature G. C. On the reverse of leaf 8 is a set of Latin verses addressed by
Keymis to Harriot. The closing lines of the Carmen Epicum are

Where new Britannia humble kneeles to Heanen,
The world to her, and both at Her blest feete
In whom the circles of all Empire meet.

The fourth part in this volume is a separate book describing Linschoten's own Voyage in the Arctic regions in 1594-95. It is the first edition of that work, and is therefore annexed to the first edition of his Book of Voyages. The latter work is in three parts. The first part relates his starting for the peninsula in 1579, his taking service in 1580 with a German nobleman travelling through Spain, his joining the Portuguese service for India in April 1583, and his voyage to India where he arrived in September of the same year. This is followed by a long description of all the lands subject to Portugal in the East, in which he remained as a soldier till his return to Portugal in January 1592. He then went home to Enkhuysen. The second part is a description of the coasts and islands of Africa and America. The third part is a Route-book or Directory for Navigation, compiled from Spanish and Portuguese sources, but also including Drake's Voyage. There are 42 maps and plates, besides the portrait and the title engravings in the Itinerario. There are 15 maps and plates besides the engraved title in the Northern Voyage.

First complete edition of Lithgow's work. A portion of it had appeared in 1614. 107 lines, with signatures A—Z and Aa—Cc in fours, Dd in 3 leaves. The text begins on the fifth leaf, being preceded by the title, the dedication, the prologue, and a leaf of verses by Patrick Hannay, Robert Allen, and John Murray.

After having made two voyages to the Orkneys and the Shetlands, and then surveying all Germany (including the Low Countries, Switzerland, and Bohemia) Lithgow started from Paris in 1609, went to Italy and the East, and returned safely from Turkey, Asia Minor, Palestine, and Egypt, reaching Paris once more he does not say when. From Paris to London, from London in 1619 he went to Ireland, and sailed from Youghal in 1620 for France. Passing right through, he entered and surveyed Spain and Portugal, but was seized at Malaga at the end of October in that year, and tortured several times before his release at the Ambassador's request in April 1621.

 Van Loon was the *Plaetsnijder*. Some of the maps bear the names of Blauw, Janson, and Laet, but most of them have no names. The rarity of the work is proved by its having escaped the researches of Mr. Asher, notwithstanding its value in reference to the cartography of New Belgium and New England.

 Small 4to. *with two large folding maps and 8 plates; limp vellum wrapper* (1591) 10 10 0
 VERY RARE WHEN PERFECT. Consisting of $\frac{1}{2}$ and A—I in fours, K 6 leaves; with 8 plates, a large map of Congo, and a still larger map of Africa, 35-90 West Longitude, by 34 N. Lat. to 38½ S. Lat. (equivalent to the measurements given in Stieler's map as W. Lon. 24—70 by 34 N. Lat.—38 S. Lat.). Traversed by the line of the Equator at 57—60 W. Lon. is a large rounded lake out of which emerges a river which joins the course of the Nile. No reasonable person will deny that this lake represents the Nyanza, which on Stieler's map is crossed by the Equator at 48—54 W. Lon.—About six degrees West and by North of that lake is another, 3 degrees N. Lat. of long and narrow shape, which is surely the Unyoro (Nyassa) placed by Stieler at 46 W. Long. by 3 N. Lat.—Below the first lake and a little westwards, at 57 W. Lon. by 11 S. Lat. is another large lake, surely the Tanganyika (Stieler 45 W. Lon. by 5 S. Lat.).—To the east of the first big lake is a small one, also connected with branches from the Nile, on the Equator at 70 degrees W. Lon. (This, from the difference of calculation of the first meridian ought to be equivalent to Stieler's 60'), but it is on the Equator at 55 W. Lon. that we find he places it.
 To get the English longitude, we must deduct about 17½ degrees from Stieler's measurement, his first meridian counting from Cape Verde, and 27 degrees from Pigafetta's measurement as he calculated from Terceira.
- 842 LOPEZ (Duarte) A REPORT | OF THE KING- | dome of CONGO, a Re- | gion of AFRICA. | And of the Countries that border | rounde about the same. | *Eleven lines lower down:* Drawen out of the writings and discourses of | *Odoardo Lopez* a Portingall, by | *Philippo Pigafetta*. | *Translated out of Italian by Abraham Hartwell.* | LONDON | Printed by Iohn Wolfe, 1597. - sections, and a folding map of Congo, both copper-engraved, and 11 full-page woodcuts; gilt russia, from the Ashburnham library 1597 14 0 0
- VERY RARE. Lowndes speaks of a blank leaf and a second title as preceding page 1 of text, but the existence of the latter is problematical, and it may have been confounded with the woodcut leaf of a royal escutcheon bearing the words "THE FIRST KING ALVARUS OF CONGO," which is marked here with the numeral 9, but is not part of the sheet in which it occurs.—In this English edition the maps are close copies of those in the Italian edition; and 8 of the woodcuts correspond to the 8 plates of that book. The tenth and eleventh woodcuts are duplicates of Nos. 1 and 7, but are integral portions of the quires in which they are found. The ninth, as just mentioned, does not enter into the pagination or the signatures; it has no original in the Italian book. The signatures which follow the 9 preliminary leaves are A—Ee in fours, of which there are only two leaves (3 and 4) in A.
- 843 LOPEZ (Duarte) A Report of the Kingdom of Congo and of the surrounding countries . . newly translated from the Italian and edited with notes by Margarite Hutchinson, 8vo. with facsimiles of the two original 1591 maps; cloth 1881 0 10 6
- 844 LOPEZ DE CASTANHEDA (Fernam). HO LIVRO PRIMEIRO dos dez da historia do descobrimento & conquista da India pelos Portugueses. Agora emmedado & acrecentado. E nestes dez liuros se contê todas as milagrosas façanhas que os Portugueses fizeram em Ethiopia, Arabia, Persia, E nos Indias, dentro do Ganges & fora dele, & na China, & nas Ilhas de Maluco, do tempo que dom Vasco da Gama . . descobrio as Indias ate a morte de dom João de Castro . .
- 8 parts in 3 vols. sm. folio, with woodcuts; large copy in calf, from the Sunderland library Coimbra, 1554-52-53-54-61 80 0 0
- The first part, and the fourth, fifth, sixth, and seventh are printed in Gothic letter; the second, third, and eighth are in Roman letter. Some of them have the author's autograph signature at the end.—The publication never proceeded beyond the eighth book, as the Queen prohibited the printing of the ninth and tenth.
- This copy fetched £106 at the Sunderland sale.
- 845 ——— another copy not quite so large, and having eleven words cut off the bottom of the first title, but in fine condition in red morocco extra, gilt edges, from the Salvá library 1552-61 75 0 0
- In this copy there is, besides the autograph signatures of the author, a note in the handwriting of Damião de Goes, addressed to some one who possessed the eight books, and running thus: "Hos otros Livros não saon acabados dimprimir porq' não quer a Raynha nossa Sñora. Si lo forhem mandarse han a V. S. yll^{re}. D. de Goez."
- Few collections can boast the possession of a perfect Castanheda.
- 846 ——— Historia del des- | CVBRIMIENTO Y CON- | quista de la India por los Portugueses, | compuesta por Hernan Lopez de Casta- | ñeda en lenguaje Portugues, y tra- | duzida nuevamente en Ro- | mance Castellano | Dirigida al muy ilustre señor don Luys | de Auila y Cuiñiga . . . | EN ANVERS. | En casa de Martin Nucio. | M.D.LIIII. | Con Preuilegio Imperial 12mo. purple morocco extra, gilt edges 1554 6 6 0
- Consisting of 232 leaves, with signatures: A, 8 leaves containing Title and prologo; text and table, signatures B—Ff in eights. The last leaf is blank.
- This is the first Book only of Castanheda's history, but it is the only part which is important for American history, as it includes Cabral's Voyage and the Conquest of Brazil. It was from this volume that the English Castanheda was translated. Nothing more was ever printed in English or Spanish.
- From the dedication one might suppose that Martin Nucio himself was the translator.
- 847 ——— ¶ The first Booke | OF THE HISTO- | rie of the Discoverie and Con- | quest of the East Indias, enterprised by | the Portingales, in their daungerous | Navigations . . London, by | Thomas East. | 1582 Small 4to. olive morocco extra, gilt edges 1582 8 0 0
- 170 leaves with signatures A 2 leaves, A 4 leaves, B—Tt in fours. Nicholas Lichfield, who dedicates the book to Sir Francis Drake, professes to have translated it

from the Portuguese, which he certainly did not. As the text of the first volume existed already in a Spanish and a French version, he may have used either. The author's prologue as given in the Spanish is an abridgment of the Portuguese prologue, and it agrees closely with Lichfield's English.

The map is thus an integral part of the book, and no copy is complete without it; but it must be allowed that most copies do not contain it. On the back of the second leaf which forms the map there is a note which may be Englished as follows—

This map of the world is placed here, in order that from it may be perceived how vast are the Indies, and the New World of the Spaniards, and how that land falls below this; and that it may be understood what their position is on that terrestrial globe which is called the World.

The work is bound up with a copy of the first edition of Cieza's *Chronica del Peru*, primera parte.

“My dear Cosens, You have got a prize. I never saw more than one other copy
of the edition of 1578, and that was as long ago as 1816”—These are the opening
words of Collier's letter dated 1869. The copies usually found are those which bear
the date of 1596 in the imprint. The first edition described above really bears no date
of printing. The year 1578 as it stands on the title page, purports only to be that of
the translation; but is no doubt also that of the printing.

The translator, Thomas Nicholas, whose full name is given at the end of the
dedication to Sir Francis Walsingham, mentions his first acquaintance with this history
as having begun in the Balearic Islands, where he was employed in the service of Thomas
Locke; and states that he afterwards met Zarate between Toledo and Castile. He
also alludes to the existence of gold in Northern America on the evidence of Frobisher
who had been persuaded by Michael Locke, merchant, to seek for it.

This is Gomara's *Conquista de Mexico*; his *Historia de las Indias* was never
translated into English.

- This noteworthy book was the first which corrected the extravagant notions prevailing in Europe concerning China, and furnished exact and useful information on the subject. The Portuguese Jesuit whose MS. was brought home by Couplet and given to the Sieur Bernou to translate and publish, knew more about China than any one else. He was born in 1609, went to Macao in 1636, from there to Hanchow, thence to Sze Chuen, and finally to Pekin. During his later years he enjoyed the favour of Khang Hi who caused him to be buried with signal honours when he died in 1677. Thus he had been in China for thirty-two years at the time when he wrote this book.

- Some people look upon the Rome edition as the first, some consider that the Cologne edition came before it. We are told in the *Art de Vérifier les Dates* that the year in Cologne in the earlier part of the sixteenth century, began for ecclesiastical purposes at Christmas; but that the civil and "court" practice was to begin it at Easter. Consequently the printer of the Imperial Secretary's letter would have regarded

MAGELLAN'S VOYAGE, *continued*:—

as "January 1523" the month which we should call January 1524. In that case the Rome edition would have preceded by two months the Cologne issue; otherwise the Cologne edition must have preceded the Roman one by ten months. The existence of an edition printed ten months earlier in Cologne would render absurd the Pope's mandate that no one should reprint anywhere else this particular book, or any other *First Edition* produced by Calvus.

The Cologne edition has not only the date of the writing, October 24th, 1522, which is omitted by Calvus, but is generally better punctuated and more correctly printed. It has, for instance, on its fourth page *duo hi reges*, which is better than the *duo ii reges* of the Roman; likewise *puta Alexandri sexti* instead of *puto*. On the other hand, the allusion to the city of Mexico as *Themistitan* is better than the *Tenostican* of the Cologne book; while the phrase *auctor circa rerum fidem quam elegantiam sermonis accuratior* is evidently an intentional but questionably beneficial change made by the Cologne editor for the *elegantia* of the Roman edition. A better change is from *illuc* to *illinc*, and *venirent* to *venerint*, a little lower down. It seems quite plain that the Cologne edition was revised by a scholar either from an independent transcript, or from Calvi's edition; while the Roman one was printed verbally from the transcript of the original sent to Calvi about November, 1522, by Francesco Cheregati, then Papal legate at Nürnberg.

Notwithstanding all agreements to the contrary, however, the world will probably continue to believe in the priority of the Cologne edition.—There was no copy of either in Mr. Barlow's collection: he had to content himself with the 1524 Roman reprint.

The first four leaves are of identical impression with those of the November 1523 edition; the remaining 15 leaves of that issue are here reprinted in 14, with a list of Errata in three lines added. The second and third corrections are of "Cynamomi" for "Gynamomi," and "concisus" for "concussis." The correct forms are given in the November edition. In the Cologne book the word *concisus* appears with greater accuracy as *conscissus*.

Although there are two copies here, this is a very rare book. It was evidently printed to serve as a continuation, or fourth part, of the Sumario (the Collection of Voyages published by the Da Sabbio brothers in 1534), but there are few copies of that work to which it has been annexed.

It contains the two original accounts of Magellan's Voyage; namely, that of Maximilian of Transylvania (see above) and the short account which Pigafetta published from his own MS. journal of the voyage.—The preface, by an editor who possessed remarkable knowledge and ability, is a very interesting document. The accounts are both translated into Italian, the first from Latin, the second from French. This latter was afterwards inserted by Ramusio in his collection, and Amoretti (see post) supposed it to be a translation made by Ramusio. His error proves that he had never seen this *Viaggio attorno al Mondo*.

Written by a French hand. The scribe was unable to understand the passage in which the author says that we English have two letters, þ and ȝ, which the other people know not, and consequently does not give it clearly; but he has made the Arab cry of faith more nearly correct than it is found in most of the MSS.—thus: *La elech ella* [allah] *machomed rosel alla*.

Fetchd at the Ramirez sale £140.

Vol. I. Acts of the Municipality of the city of Mexico from March, 1524, to June, 1529, copied by Don J. F. Ramirez, pp. 644. Ramirez has added 169 notes to this volume, illustrating some historical points, and has made an ample Index in his own handwriting in two leaves.

Vol. II. Copied under the care of the Lic. Don. MANUEL OROZCO Y

BERRA, containing the Acts from June, 1529, to September, 1532, in 649 pp., and two leaves of Index by Ramirez.

Vol. III. Copy also made by OROZCO, containing the Acts from January, 1533, to December, 1535, and extracts for the years 1536-1543, in 637 pp., and two leaves for the Index by Ramirez.

Vol. IV. Containing the Acts from Dec. 1550, to June, 1559, in 489 unnumbered leaves.

Vol. V. Containing the Acts from June, 1559, to Dec. 1561, in 431 unnumbered leaves.

Vol. VI. Containing the Acts from Jan. 1562, to April, 1564, in 317 unnumbered leaves.

At the end of the volume we learn that there is found in the original books a note in the handwriting of the eminent scholar Dn. Carlos Siguenza y Gongora, in which he states that during the tumult which took place in Mexico on the 8th of June, 1692, when the mob burned both the national and the municipal palace, he saved the original Actas.

The value of these six volumes as historical documents cannot be exaggerated, and anyone who has dedicated himself to the study of the years immediately following the conquest, and who knows the important part which the Municipal Councils of those times took in all public affairs of consequence, will at once recognize their utility, because they form not only the foundation of Colonial history, but, to a certain extent, that of a society and a civilization that were disappearing.

The volumes contain also copies of a great number of "CEDULAS REALES," letters from important personages, such as Cortés, Alvarado, and others.

A small part of these Acts has been printed in the Boletin Municipal de Mexico, but merely in extracts, which have been edited in such a careless manner, and issued in such a small number of copies, that these volumes lose in consequence nothing either in value or importance.

This MS. is partly unpublished. In 1822, the report was printed in London in English, with 16 illustrations. So far only was Del Rio's work known to Stephens and Catherwood. Thus the phrase "not reproduced by Del Rio" will be found in Stephen's work on Central America, even as regards the large fine tablets which he thought he was reproducing for the first time as "neither Del Rio nor Dupaix has given any drawing," while they are in the above as figures 26—30.

The *deputado* Mariano Robles caused this copia fiel to be made soon after the presentation of Del Rio's report.

This valuable collection consists of copies, from unpublished documents belonging to the Jesuits in Mexico in the last century and were selected and gathered as a collection as far back as 1792 by Francisco Garcia Figueroa. The collection was transcribed for the late Jose de Ramirez. A portion of the contents has since been printed in the Documentos para la Historia de Mexico.

This collection fetched £7. 15s at the Ramirez sale.

Some parts are in MSS. ; others are printed. The contents are :—

1. MS. dated Mexico, Nov. 3 de 1571. Edicto general del Dr. Pedro Moya de Contreras. ORIGINAL, 2 leaves. It is the first document issued on the establishment of the Holy Office in New Spain. It condemns all the followers of the "lei muerta de Moisen de los Iudios . . . la malvada de Mahoma . . . la seta de Martin Lutero," and prepared the New World for the celebration of the first *Auto* which took place in 1574, with 21 Lutheran heretics for the victims. This is the original counterpart of the Edict deposited in the archives, and is signed by Pedro de los Rios, secretary of the Archbishop.
2. Edicto general de los Inquisidores, 25 de Sept. 1745, 6 leaves.
3. Edicto general, 14 de Enero, 1698.

11. Reglas y Constituciones de los Inquisidores, the title and two leaves of woodcuts from the edition of Mexico, 1659, followed by two other printed leaves which bear the autograph signatures of the Inquisitors of 1745, and this written date ; the text of the Reglas written as a copy from the old printed book, with the intentional omission of Cap. VIII, with official certificate, dated 1787, of Fr. Manuel de Lejarza the "Notario Revisor y Expurgador."

This, from its peculiar composition, is a very curious document.

This was transcribed of course from a sixteenth century document and is almost identical with the text given by Lord Kingsborough.

CONTENTS :

I. MEMORIAL DE LOS INDIOS DE TLASCALA AL VIRREY.

A contemporary copy of a petition which the Indians presented to the Viceroy, setting forth in the most touching language the manner in which they had aided Hernan Cortes in the conquest, the non-fulfilment of the promises which they had received, the consequent miseries of their lot and the heavy contributions under which they were groaning, etc., and begging relief from their burden. The date is marked by a passage referring to the epidemic of "los años pasados de 76 y 77," and the fact that the Tlascalan population had been reduced by that plague from over 200,000 persons to 24,000.

XVII-XVIII

105 0 0

This splendid and highly important collection relating to the principal missions from New Spain was formed by the late Don J. F.

Ramirez at the cost of much labour and money, and comprises all he was able to gather on this subject during forty years. It contains over 300 pp. relating to California, about as many on the subject of Sonora, and nearly 1000 on New Mexico and Texas. The contents will speak for themselves.

Vol. I: 1. Diario autografo del Padre Morfi a las Misiones de Texas y Nuevo Mexico en 1777, 290 leaves (*published in the 3rd series of the "Documentos para la historia de Mexico"*)—2. Noticias sobre el Parral, *in the handwriting of Father Morfi*—3. Informe del Padre Morfi sobre el viage de los P. P. Dominguez y Escalante á California, 7 leaves.

Vol. II: 1. Relacion del P. Garces de su Mision a Sonora, 1762, 7 leaves (*copy*)—2. Varias Cartas del Pe. Garces sobre lo mismo, 5 leaves—3. Diario de la Ruta y Operaciones que el Capitan Juan Ba. de Ansia practico en solicitud de abrir comunicacion desde Sonora hasta la California, Sept. 17 de 1774, 25 leaves—4. Carta del Pe. Velez sobre el camino del Nuevo Mexico a Monterey, 2 leaves—5. Informe del mismo sobre las Misiones al Padre Morfi, 7 leaves (*published in "los Documentos"*)—6. Diario del mismo, 35 leaves—7. Diario historico de los viajes de mar y tierra hechos al Norte de la California de orden del Exmo. Sr. Marques de Croix, y por direccion de D. Joseph de Galvez, executados por la tropa de Don Gaspar de Portola, y los paquebots S. Carlos y S. Antonio [escrito por Miguel de Costanso], *printed in Mexico*, 1770, pp. 56 and 3 unnumbered leaves—4. Costanso, sobre las nuevas Misiones de Monterey en California, 4 leaves—5. Noticias de la expedition Militar a Sonora y Sinaloa, *printed in Mexico*, 1771, 12 pp. fol.—6. Misiones de Sonora, 1772, 9 ll.—7. Informe del Padre Pinella sobre las Misiones del Norte, 3 leaves—8. Carta del Pe. Escalante sobre las Misiones de Sonora, 1775, 5 ll.—9. Informe del Fr. Beleña sobre Sonora y Cinaloa y los tributos que se pagan, 21 leaves—10. Costanso's account of the S. Carlos and S. Antonio expedition along the coasts of Northern California is excessively rare. Junipero Serrá was with the expedition. This printed piece and the annexed MS. *sobre las nuevas Misiones*, form the first account of the Spanish settlements in Upper California.

902 MOTA PADILLA (Mathias de la) Conquista de el Reyno de la nueva Galicia en la America Septentrional, fundacion de su capital ciudad de Goadalaxara . . description de los Reynos de la Nueva Vizcaya, Nueva Toledo o Nayarit. . . Sonora y Sinaloa, con noticias de la Ysla de la California, sm. folio, *plainly written MS. some leaves water-stained, about 750 pp. hf. bd. from the Ramirez library*.

(Mexico) 1742 (? 1750)
The oldest and best MS. of the work now existing, apparently contemporary with the author's MS. The text has been printed more than once since the first edition in 1835, but it still requires to be critically edited, according to the admission of Yezbaleceta, who himself published one, in 1870, for the Geographical Society of Mexico.

- 903 OPUSCULOS VARIOS : MS. in folio, 305 leaves, containing a collection of miscellaneous documents, some originals and some transcripts (a few printed), ranging over different epochs, but relating mostly to the last and present century, hf. calf, from the Ramirez library *Sec. XVIII-XIX* 10 0 0
- The high official positions which the late Don J. F. Ramirez occupied at different times, as a member of the several Cabinets and also of the Supreme Court of Mexico afforded him ample means of obtaining the documents which form this interesting collection, in which an immense amount of historical and statistical information is contained. It includes thirty interesting autograph letters from political personages and diplomatic agents in Europe—such as PASCASIO, ECHEVERRIA, ARRANGOIZ, VALDIVIELSO, OSEGUERA, JOSE MARIA LUIS MORA, ZAYALA, COMONFORT, MARIANO RIVERA, and others—which are interesting for the modern history of Mexico. It also comprises a MS. copy of Tapia Zenteno's "NOTICIA DE LA LENGUA HUAASTECA" on 41 leaves.

- 906 PORTOLANO. 6 LARGE MAPS ON 7 LEAVES OF VELLUM, each map occupying the space of two open pages ($14\frac{1}{2} \times 12$ inches), representing the coasts of Turkey in Asia, Turkey in Europe, Syria, Egypt, Greece, the Islands, Dalmatia, Italy, Sicily, Sardinia, Corsica, the Riviera, France, the Balearic Islands, Spain, Africa from Egypt along the North coast down to Cape Bojador on the West, the Canaries, Madeiras, Azores, Europe from Finisterre to Friesland, with the British Islands.
- Sm. folio, bound in wooden boards covered with stamped leather, a binding executed about 1480
- Apparently the work of an Italian sailor about 1480 30 0 0
- 907 ——— A later Portolano, 5 LARGE MAPS ON VELLUM, with numerous illuminated designs of Wind-roses, towered cities with banners, etc.; each map or sheet being 18×14 inches, somewhat similar in character to the preceding except that the entire coasts of the Black Sea and Sea of Azov are given, and the whole coast of Africa as far as the Cape of Good Hope; and that the map of North Europe comprises the fabulous island of Friseland with some twenty-four names of places on it ; bound as a volume in gilt russia Joan Martines En Messina Any 1583 50 0 0
- A fine example of its kind, done by a Catalanian seaman in Sicily. Its main interest however is that of historical association. An inscription by Lord Burleigh on the back of the last leaf states that it was presented to him in 1595 by Admiral Howard. We have therefore reason to believe that this book of maps was carried to England in one of the ships of the Spanish Armada, and that it fell into the possession of the Lord High Admiral as one of the spoils of his victory.
- It afterwards passed into the hands of Charles Bailly, Prince Rupert's Governor of Hudson's Bay in 1672.
- 908 PORTOLANO. MS. ATLAS, CONSISTING OF 24 LARGE LEAVES OF VELLUM, with Hydrographical Maps of the world, COLOURED AND ILLUMINATED by a Portuguese seaman, preceded by tables of Declinations, Calendar, etc. large square folio, calf About 1600 63 0 0
- Arranged as follows : The first leaf is blank, the second contains a large and finely drawn picture of the Crucifixion. Fol. 3 is adorned with painted roses and leaves, and some large illuminated letters accompanying the description of the Sun's movements. On fol. 4 begin Rules for the movable feasts, with flower-decoration beautifully done.

On the reverse of that leaf and the obverse of leaf 5, there are two wind-roses (or compasses). The back of fol. 5 and front of fol. 6 are tables connected with the Calendar. Leaves 7-12 contain the tables of "Declinações," ending on page 24. Page 25 is a map of Northern Europe, 26 and 27 South Europe, the Mediterranean, and North Africa. 28 Turkish dominions, 29 a part of Brazil, 30 and 31 West Africa, 32 South East Africa, 33 the same continued Northwards, 34 and 35 From the Red Sea to Ceylon, 36 The two Indias and the Islands, 37 the same extended Northwards with the Philippines and Japan, 38 Coasts of New Guinea and its neighbours, 39 Atlantic coasts, 40 West Africa, 41 Mexico and California, 42 West South America, 43 East South America, 44 Regions near the mouth of St. Laurence, 45 West Europe and North West Africa and Islands, 46 and 47 The West Indies from Florida to the Amazon, 48 Spain and West Africa. There are various paintings of figures, towns, etc., in the blank spaces on the maps.—The prominence given to Lisbon and the Portuguese escutcheons would seem to show that the work was done before 1580, but it was probably somewhat later, although certainly before the discovery of Le Maire's strait.

MAPS

909 FRENCH MAPS OF THE WORLD, drawn in 1536, 1546, and 1550.

FACSIMILES OF THREE MAPPEMONDES.

1. The Harleian Mappemonde (Anonymous), a facsimile on 15 sheets with a sixteenth sheet containing a reduction of the whole as a Key-map. About 1536. Undated but bearing the arms of the Dauphin. As it is based, so far as North American Discovery is concerned, upon the result of Cartier's first two voyages, and is clearly older than later expeditions it must have been drawn between 1536 and 1542

(In the British Museum)

2. The Mappemonde of Pierre Desceliers, executed at Arcques near Dieppe in 1546. Facsimile on 15 sheets, with a Key-map of the whole. This contains interesting evidences of the Discovery of Australia and of the further investigation of Canada in 1541-42

(Supplied by me to the Bibliotheca Lindesiana)

This map like the preceding was done for Henri II while still Dauphin.

3. Second Mappemonde of Pierre Desceliers, executed at Arcques in 1550. Facsimile on 15 sheets, with a Key-map (In the British Museum)

Each set in a portfolio; the whole enclosed in a red cloth case, impl. folio size

910 MAP OF NEW YORK. JOST DANCKERS, Engraved Map of Novum Belgium, with the VIEW OF NIEUW YORCK in its lower portion (size of the plate $22\frac{1}{8}$ inches \times $18\frac{1}{2}$), framed and glazed

(Amsterdam, about 1685) 20 0 0

FIRST EDITION of Danckers' celebrated Map; probably also the OLDEST ENGRAVED VIEW of New York bearing the name of New York. The title of the map is "Novi Belgii Novæque Angliæ necnon Pennsylvaniae et partis Virginiae Tabula multis in locis emendata a Justo Danckers." The title of the view is "Nieuw Yorck eertijds (sic) Genaemt Nieuw Amsterdam opt Eylant Manhattans." The view itself is oblong, $12\frac{1}{2} \times 2\frac{3}{4}$ inches, and is in the original colouring. The drawing of the View of New York is attributed to Augustin Heeremans who was living about the middle of the seventeenth century. It is a picture differing entirely from the little View of the Fort of New Amsterdam which was engraved in 1651 and 1656.

Only 200 copies were printed. The MS.—“un des plus précieux manuscrits de Marco Polo,” says M. Leopold Delisle—was in the library of the Louvre in 1411.

- 914 ——— *Editio Princeps*. Fol. 3a: Incipit liber pm^o dñi marci de venecijs . . Fol. 74a, last line: Explicit liber dñi marci de venecijs Deo gracias
Small 4to. 74 leaves, with signatures a-k (of which i is in four leaves, k in six, and all the others have eight leaves), 33 lines to the page; fine copy in pristine condition, bound up with the Mandeville and the Ludolphus as described below; in the original boards covered with stamped leather S. n. (Antwerp, Gerard Leeuw, about 1485) 63 0 0

A similar volume containing the same three works fetched £150 at the Sunderland sale. The Marco Polo is infinitely rarer than its two companions; but their combination is valuable as shewing that the same press produced all the three works about the same time and in a determinable sequence. The signatures of the Marco Polo are a—k; of the Mandeville A—H; and of the Ludolph aa—hh.

The Ludolphus may be described thus: Fol. 1: Registrū . . Fol. 3: Prologus in lib^{ro} dñi ludolphi de suchen. de tra sācta et | itinere iherosolimitano . . Fol. 54b: . . Domini ludolphi ecclie prochialis in Suchen pastoris | libellus de itinere ad terram sanctā Finit feliciter.

The Mandeville.—Fol. 1 blank. Ff. 2, 3, 4: Tabula. Fol. 4b: Liber pñs cui9 auctor fert^r iohānes de māderville militari (sic) | ordīs . . Fol. 58 (ought to be 62) on the reverse: . . Explicit . . . Quod opus vbi inceptū simul et cōplētū sit ipa elementa seu singularā seorsū caracteres lrarum . quibus impressū | vides venetica, monstrant manifeste. In the sixty-two leaves of which this part ought to consist, those which should count as 57-60 are missing.

All three books are printed in the same type, at the same press, about the same time. There is no doubt that Gerard Leeu was the printer (notwithstanding the peculiar logic of the colophon to Mandeville.—“The Venetian letters in which you see that the work is printed, show plainly where it was begun and finished”) and there is no doubt that the binding of the present set was executed in Antwerp about 1485.

| | It raises our admiration for the author to learn at the very beginning of his work that God was a Puritan at heart, and that he gave to the New Englanders the land of the Indians for their rightful possession. This reminds us of the story told <i>ante</i> under Fernandez de Enciso,—the only difference being that the gift was made in that case by the Pope to the King of Spain; while in the later instance the Almighty himself stepped in to endow his faithful Puritans with the property of other men. | | | |

This is a reissue of the 1574 edition, with a new license which had evidently been applied for by Monardes himself. He died before the printing could be finished, and the portrait above referred to was added on leaf A 3 at the head of the <i>Elogio</i> in verse by Gonçalo Çaticco de Molina. The portrait is referred to as being in <i>his Museum</i> , but whether the <i>his</i> refers to Zaticco or to Monardes is not clear. The same verses had been given, with the same heading, in 1574, but the portrait was not engraved till after the death of Monardes in 1578. | | | |

- 982*— another copy, quite clean, but having some MS. notes written on the
margins about 1700; red morocco extra, gilt edges, by Riviere 1615 4 4 0
- The very rare French edition published in 1630 is probably no more than a re-translation of this English one, which is likewise rare. Hector de Feynes, Seigneur de Monfart, quitted France in 1608, on account of some offence from the Cardinal de Joyeuse, travelled incessantly in the East (in the Turkish Empire, Persia, India, Ceylon, the Archipelago, Burma, Siam, Annam, China) till 1610. He then returned in a Portuguese ship to Lisbon, was at once seized by the Spanish government, and held a prisoner for four years. The negotiation for the double royal marriage in 1615 led to his liberation. The translator into English who signs his dedication with Δ, was evidently a French Huguenot and was in Paris when Monfart returned. To him was given the complement of the narrative partly from the written notes and partly from the spoken statements of the traveller. Δ retained his own draught, one copy was made for the King, another for a great prince, and a third for Monfart himself. Now, Δ thought he owed it to his second country (in which he was to reside, his mother having been an Englishwoman) to give the work to the press in the English language.

 The second book printed in Spain, in which allusion was made to the New World—the first having been the Letter of Columbus.
 This was printed (as the verses on the title give us to understand) as an introduction

to an intended edition of the Cosmographers. The first volume of the texts (and the only one) was the Pomponius Mela which was produced at the same press and in the same type, with a colophon giving the place as Salamanca and the year as 1498.

This is a tract of extreme rarity—the only copy described in the *Ensayo* was a poor one which had belonged to Ferdinand Columbus.

On the second leaf, Nebrija alludes to the newly discovered lands in the west, and says, "Such is the daring spirit of the men of our time, that they will soon bring us a true description of that land, both of the islands, and of the continent, of a great part of the sea-coast whereof the sailors have given us an account; that part chiefly which lies opposite to the newly discovered islands (Hispana, Isabela, and the others adjacent to them)."

He also alludes to the discoveries of the Portuguese of the open communication between the Atlantic and the Indian Ocean.

- This book contains the proceedings of a momentous period in the history of the Church of New England. The heads of that Church began to drift apart from their fellow-Puritans in Old England because of the attachment of the latter to a formal liturgy; and John Cotton and John Davenport took the side of the Libertines. In 1637, the Old Englanders framed the Nine Positions and requested from the New Englanders a specific statement on all the points. In 1639 came the Answer from Davenport, which evidently afforded no satisfaction to the Old Englanders, and John Ball (an able minister) was requested to write the Reply, which was sent in 1640, and is the last word in the controversy, so far as the whole proceedings were gathered here by Ash and Rathband at the request of the London Puritan clergy.

- After the general title, and the preliminary address by H. Peter (Hugh Peters?), which forms 2 leaves added for the purpose of gathering the two distinct pamphlets; the Questions are stated on pp. 1-6; the Answers follow on pp. 7-84. Then follows the Apologie with its separate title and the imprint of T. P. and M. S. for Benjamin Allen . 1643. This title is followed by the text, pp. 1-46, containing a Discourse; then a title of "An Answer," with the same imprint, the back of the title being marked as p. 50; finally, the Epistle and Answer on pp. 51-78.
- Richard Mather probably compiled the Answer to the thirty-two Questions; John Davenport, as above stated, wrote the Answer to the Nine Positions, probably with the aid of John Cotton. The Apologie is said on its title to have been an Answer to Bernard in 1639. In the calf copy "Sam. Mather" strikes the statement out, and says, "This is a mistake. It was another Discourse that was sent to Mr. Bernard."

| | There are 8 pp. in the Alarm; the N. Y. Freeholder begins with page 9 and goes on to p. 64, there being no gap in the numeration between Nos. As on p. 43 the surrender of Lord Cornwallis is mentioned as an event of "last autumn," the date must be 1782; but it is curious that no date of printing appears anywhere in it. | | | |

- The title is engraved, and bears a portrait of each of the two brothers, as well as their escutcheon and a view of the two ships.
- The map of the Strait called by the Dutch Le Maire's Strait, is much more exact and ample than the one published in Schouten's voyage three years earlier.
- 1033 NORDENSKIÖLD'S GREAT ATLAS: Facsimile ATLAS to the EARLY HISTORY of CARTOGRAPHY, with English text rendered from the Swedish by EKLÖF and CLEMENTS R. MARKHAM. Royal folio; with 51 large maps printed as plates, and 84 of somewhat smaller size printed in the letter-press reproducing the rarest and most important maps which were printed in the fifteenth and sixteenth centuries, half morocco, uncut, sold to subscribers, £10. 10s Stockholm, 1889 5 0 0
- An admirably scientific work, which may be regarded as almost exhaustive of the subject. Jomard and Santarem might be said to have produced an imperfect first volume of an Illustrated History of Cartography treating irregularly upon the manuscript sources; Nordenskiöld's atlas might be called the complete second volume dealing with the entire printed or engraved material. The lists of contents will exhibit the nature and importance of the book. It is indispensable as furnishing by far the best apparatus for studying the growth of geographical science, and the gradual enlargement of knowledge with regard to the surface of the globe.
- Nothing of this kind, and upon such a scale, has been executed before. The work is admirably done, and the text is of great critical and historical importance.

EXCESSIVELY RARE, and of considerable importance for the History of California. Some passages on p. 220 make it appear that the writer was identical with the Jesuit Jose Ortega, who published a <i>Cora Dictionary</i> at Mexico in 1732; but the prologue shows that he incorporated in a continuous narrative the reports of others besides himself. He laboured for thirty years in Lower California, and in the regions between the Colorado and the Gila rivers; and on page 242 we learn that he had the use of the MS. papers of Eusebio Kino, in which "están coordinados sus viajes, empressas, y descubrimientos." The author enlarges upon purely historical events and anthropological facts to a greater degree than most ecclesiastical writers. | 6 | 0 | 0 |

| | A valuable volume, apparently the office book of the Plantation Commissioners. Richard West was their consulting authority, and this MS. contains the proceedings with regard to the Colonies upon which they questioned him; with his answers. The business dealt with is in reference to New York, New England, Nova Scotia, New Jersey, Pennsylvania, Virginia, Carolina, Antigua, Barbadoes, Bermuda, St. Christopher, Jamaica, Leeward Islands, etc.—The MS. is one of vital interest and importance to the historian of English rule in the American colonies. | | | |
| 1134 | PLANTATION REPORTS. An Office Book in MS. containing Reports, Letters, Queries, Instructions, and political papers relating to the administration of the English Colonies in America, sm. folio, neatly written in various hands, 830 pp. with a large Map drawn by Capt. Young showing the coasts and islands of Nova Scotia; rough calf <i>1717-22</i> <i>1717-22</i> | 60 | 0 | 0 |
| | That this volume once belonged to the English statesman Daniel Pulteney as evident from the fact that most of the papers are directed to him, and especially in one dated 18 August 1722 is the original commission from the King (with the seal and signature of "George R" and "G. R.") instructing Pulteney to settle the question in dispute with the French Court, regarding the islands of Santa Lucia and St. Vincent.—One of the documents is a Representation from the Board of Trade in 1700, pressing for the fortification of New York, Albany, Schenectady, etc. with curious matter relating to the Indians in alliance with France and those dependent on England. The first 360 pp. relate to the West Indian possessions, and are followed by the paper just referred to; pp. 365-595 relate to Nova Scotia and the fisheries, and are intermingled with older papers concerning former transactions and the early history of that colony, beginning with the celebrated Cabot voyage. Pp. 601-627 contain the original Journal of Cyprian Southack of his voyage from Boston to Quebec and back in 1714, made by command of the authorities to receive English prisoners restored at the conclusion of | | | |

peace between the two Crowns. Pp. 639-662 are (Pulteney's?) autograph minutes relating to Nova Scotia. The remainder of the books consists of English and French documents in connexion with the Commissioners appointed for the settlement of the Accadian business.

A GREAT RARITY: the complete Greek text of the famous Alexandrian Geographer, but without any maps. This text is marked on the first page as having been corrected and annotated (about 1320-25) by Nicephoras Gregoras, the Byzantine historian, and to him is probably due the substitution of leaves 61-101 (completing the book) for the original 61-74 (which had left the book unfinished, and which are still preserved at the end of the MS.). To him also we may ascribe the insertion of 21 blank leaves between leaf 80 and 81—this having been done probably for the purpose of getting maps to illustrate the book.

The MS. is therefore of considerable interest from more than one point of view, and is in no degree inferior (but rather superior) to the codex of the same age which was published in facsimile by Didot. The autograph inscription of Nicephoras Gregoras runs thus—

Τὸ παρὼν Βιβλίον ἐδιορθώσεν καὶ ἐξηγῇ μετὰ σχολῇ Νικηφόρος ὁ Γρηγοράς.

JOHAN RUYSC, which was the first published design of the New World ;

Ruysch's map was THE FIRST PRINTED DELINEATION OF THE NEW WORLD, and
is EXCESSIVELY RARE. It was also absolutely the first Map of the World, whether
printed, or manuscript, in which the American side of the Atlantic made its
appearance.

The bookseller Tosino gives in his dedication on the back of the title a good
account of the labours of the various editors, of whom Friar Marco Beneventano was
the busiest. The book was got ready in 1507 with 33 maps. Twenty-seven of these
were printed from the same plates as those in the Ptolemy of 1478-90 ; and six new
ones (of Scandinavia, Spain, France, Italy, Germany, and the Holy Land) were added.
Finally Tosino, who was himself an eager inquirer, desired to add a record of the new
discoveries in progress during the past twelve or fifteen years, and he made the
acquaintance of Johann Ruysch, who immediately supplied him with the World-map
that was wanting. The references made to this Ruysch by Marco Beneventano prove
that he was a man of singular ability. What he was doing in Rome in 1507-8 we
cannot guess, but he had evidently been a seaman in a Bristol ship (perhaps with the
Cabots), and had had personal experience of the Transatlantic coasts. He seems to
have justified his description by Marco as "the most skilful of the geographers, in my
opinion, and the most careful in depicting the world ; whose aid I have had in
compiling this treatise."

Some curious particulars are to be had from Marco's text. He had seen maps
drawn (in MS.) by Columbus the discoverer and Columbus the *nepos* ; also an engraved
mappa universalis produced in Venice by a certain unnamed Florentine, and he
describes the mode of projection in which they were delineated, as well as that of his
own Ruysch map. The unknown Florentine must have been Vespucci, although the
map no longer exists to enlighten us. In the chapter on the *Mundus Novus* which
"tum Columbus tum Lusitani observavere," the Florentine is not mentioned, but the
reference to a Portuguese voyage to 50 deg. south latitude proves that the text of
Vespucci's *Lettera* must have been known to Marco.

This celebrated edition is the first in which the two maps above referred to were
printed ; namely, the "Hydrographia" and "the Admiral's Map." These maps
were prepared for the press in 1507 according to the statement made by the editors
Eszler and Übelin. They were probably taken to Lorraine at the same time as the
French text of Vespucci's four letters which were printed in the *Cosmographia*
of 1507.

the *Situs Orbis Hydrographorum* with parts of Brazil and Labrador, and the third the celebrated "Admiral's map," showing all that was known of the New World in 1510; but also because it was one of the principal pieces of evidence against Servetus (Villanovanus). In the text on the back of the 41st map (Palestine) it is said that "Only by falsehood or mere boasting, has such excellence been ascribed to this land by the Bible and by Josephus, since experience shows it to be uncultivated, sterile, and lacking in all sweetness." In vain did Servetus protest that these words had appeared in the edition of 1525, ten years before his own reprint was published: he was burnt by Calvin's friends for his impiety.

First Edition of Münster's Ptolemy. The old maps are 27 (1 × 10 × 4 × 12), the new maps are 21 (they include a World-map, and a map of America).—The work is bound up with: "Solini Polyhistor . . Pomponii Melæ . . libros tres . . adiunximus . . Basileæ 1538" in which there are two folding maps.
- 1173 — Geographiæ Clavdii Ptolemæi . . Libri VIII . . Tabulæ nouæ . . small folio, 54 maps; hf. vellum (Basileæ, 1552) 3 16 0
This issue was meant for circulation in France, as it bears no imprint, but has the licence of Henry II. Seven of the modern maps of 1540 were cancelled and substituted by 13 new ones. Beyond this, the modern World-map was re-engraved with considerable modification.
- 1174 — Italian, with Gastaldo's maps. Title: PTOLEMEO | LA GEOGRAPHIA | DI CLAUDIO PTOLEMEO | ALESSANDRINO, | Con alcuni comentii & aggiunte fat | teui da Sebastiano munstero Ala | manno, Con le tauole non solamente | antiche & moderne solite di stūpar- | si, ma altre nuoue aggiunteui di Me | ser Iacopo Gastaldo . . | . . , ridotta in uolgare Italia | no da M. Small 8vo. with numerous copper-engraved maps; a fine copy in the original beautiful binding of olive morocco, gilt with a Grolieresque pattern, and in absolutely perfect preservation Venice, 1548 20 0 0
This is one of the indispensable editions of Ptolemy, representing in its maps a great advance upon all anterior efforts to illustrate the best geographical knowledge of the time. Gastaldo may be said to have created a new era, by his addition of five special maps of America to the two world-maps which he designed for this edition. It was the first time that anything of the kind had been done; all preceding editions having confined themselves to a single general map so far as the New World was concerned.—Such another copy as this is not likely ever to be seen.
Collation: + and A—DD in eights (the last leaf of DD a blank); 60 numbered maps of two leaves each; table a-h in eights.
The maps are as follows: The British Isles, 2 maps; Spain, 2; France, 2; Low Countries, 1; Germany and Denmark, 2; Switzerland, Austria, Illyria, 1; Dalmatia, 1; Italy, 2; Piedmont, 1; Marches of Treviso and Ancona, 2; Corsica, Sardinia, Sicily, 2; Eastern Europe, Livonia, Prussia, etc., 2; Scandinavia, 1; Albania, Macedonia, etc., 1; Poland and Hungary, 1; Greece, 2; Africa, 9 maps; Asia, 19 maps (including Moschovia); America, five maps consisting of South America, New Spain, North America (Canada and Newfoundland, etc.) Cuba, Hispaniola; and two World-maps.
- 1175 — Geografia . . tradotta di Greco . . da Girolamo Rvscelli . . ampliata da Gioseffo Rosaccio . . 4to. 69 engraved maps, of which 27 are ancient, and 42 modern; fine large copy in the original limp vellum Venetia, M.D.XCVIII (1598) 2 2 0

The last but one of the modern maps is the famous Zeno Chart.

The first voyage he made was with Mendaña in 1595 to rediscover the Solomon islands; but although they failed Quiros then made his first acquaintance with the regions of Australasia. In 1603 he started from Spain for America to prepare for the voyage (1605-06) which is considered as the first event in Australian history. | | | |

| | THIS IS THE FIRST EDITION OF THE FIRST BOOK IN ENGLISH ON THE DISCOVERY OF AUSTRALIA. There is an absurd note in the Huth catalogue stating that Quiros's narrative relates to land below Magellan's Straits, and not to our Australia. The fact is that it was the official report of a voyage in which Torres Strait and the Gulf of Carpentaria were discovered by Paez de Torres whom Quiros accompanied; and the latter used his relation as a vehicle for expressing a desire that the Spanish King would allow him the monopoly of future research. | | | |

 Eight preliminary leaves and 112 numbered pages.
 On page 101 the text of Raleigh ends, and the concluding 11 pp. are occupied
 with "An Abstract taken out of certaine Spanyardes Letters concerning Guiana."
 The voyage which led to the writing of this great work of imagination began on
 6 February; and the explorers reached Trinadad on the 22 March, which was
 not bad sailing. These dates must refer really to the year 1595, not 1596, as the
 narrative seems to cover a great deal of time, although it avoids dates except at the
 very beginning.
 Whatever may be thought of Raleigh's *bonâ fides*, he planted El Dorado in English
 literature; and this book is its monument.

The map is one of modified Ptolemæan kind, but in its lower portion there is a curved line extending from Southern Africa to the East of China, which indicates an unknown sea. On it are the words "Hic non terra sed mare est in quo mire magnitudinis Insule sed Ptolemeo fuerunt incognite." This is the nearest approach to a mention of the New World about which the cartographer had hazy notions. However, we have to remember that the design was made about 1502.

This splendid work gives the first accurate account of one of the large Peruvian burial-grounds.
The illustrations of the Necropolis of Ancon are reproduced in chromos directly from the water-colour drawings taken from the originals, which are at present in the possession of the Ethnographic department of the Royal Museum at Berlin. The whole work consists of about 140 chromolithographic plates, each of them accompanied by explanatory notes and followed by a descriptive text.

The text consists of 8 preliminary leaves, and pp. CLXVIII, 185 (with a folding table) and 20. The Atlas consists of 2 leaves of letterpress and 16 engraved maps and plates. This expedition for a scientific survey of Nootka Sound and Vancouver's Island preceded Vancouver's performance but was not printed till later. It is very rare.

<i>A slightly reduced facsimile, coloured and gilt, by Griggs (55 × 23 inches) of the original map drawn at Seville in 1529, now in the possession of the Pope; mounted on linen</i> 1529-1887
A marvellous piece of work for its time. Any one who wishes to learn exactly how much was known in 1529 of the earth's surface must have this facsimile. No other means can procure him what he wants, since even if it were possible easily to get facsimiles of some of the other charts of the period, there is not one so full and so correct as this Ribero map of 1529.
At the foot of the map the escutcheon of Pope Julius II (Rovere) is printed. To the left a shield quartering Rovere and Chigi. On the right the Chigi arms.
As Alexander VII was a Chigi he probably gave the map to St. Peter. | 1 | 1 | 0 |

| 1268 | SANTA CRUZ. MAP OF THE WORLD by the Spanish cosmographer, Alonzo de Santa Cruz, 1542. Reproduction in phototypic facsimile by the printing office of the Swedish Staff-General [from the unique MS. original now in Stockholm], <i>five large sheets in imp. folio, with a royal 8vo. text of Explanations by E. W. DAHLGREN, bds.</i> Stockholm, 1892 | 1 | 0 | 0 |
| | No other copy is known, either in or out of Spain, of this valuable map, which was drawn on vellum by the hand of Santa Cruz in 1542, he being then the Cosmografo Mayor of the Royal Department of Charts at Seville. It is entitled "Nova verior et integra totius orbis descriptio," and bears the imperial arms of Charles V, to whom it is dedicated. It represents the world as two hemispheres, with the poles as centres, and is arranged in gores as though intended for the model of a globe. The American portion is undoubtedly that which constitutes the chief interest of the work, and its importance in that respect is heightened by the immense number of geographical names inscribed upon it. Although until recently quite unknown to modern scholars, this map is evidently the one referred to in the "Diferencia de Libros" of Venegas (printed in 1540), who described it on account of the new method of projection on which it was designed. The difference of date between 1540 and 1542 merely implies that Venegas had seen the draught plan two years before the work was finished in its existing ornate condition by Santa Cruz. | | | |
| | As one of the most valuable of the series of world-maps produced within half a century of the great discovery of Columbus, the work of Santa Cruz must be found indispensable for the use of students in this fine reproduction, the only form in which it is accessible. | | | |

liminaries and the text; and a plate of the Animals of New England, designed specially by Hulsius, is placed opposite p. 28.

This translation of Smith's Relation of 1616 forms part 14 of the Hulsius Collection of Travels.

- 1328 SMITH (Capt. John) THE GENERALL HISTORIE of Virginia, New-England, and the Summer Isles: with the names of the Adventurers, Planters, and Governours from their first beginning An^o: 1584. to this present 1624. WITH THE PROCEEDINGS . . . Also the Maps . . . By Capitaine IOHN SMITH sometymes Governour in those Countreyes & Admirall of New England. LONDON. Printed by I D and I H for Michael Sparkes . 1624 .

Small folio, engraved title with portraits; portrait of the Duchess of Richmond engraved by FRANCISCO DELARAM; four folding maps (Ould Virginia, Virginia, The Summer IIs, and New England); the title mounted, and a modern plate of Matoaka inserted; fine copy in brown morocco extra, gilt edges, by Zaehnsdorf 1624 50 0 0

This copy is better than most of those which are now purchaseable. The title is of the genuine issue of 1624 having portraits of King James, Queen Anne, and of the bareheaded "Carolvs Princeps." The portrait of the Duchess of Richmond is a genuine original impression of Delaram's plate; the maps of New England, of Ould Virginia, and of the Summer IIs are in their original state as issued in 1624. The map of Virginia bears the numbers "1690-1691" (altered from "1692-1693") which prove that it was not printed before 1626, but this is the only point in which the volume cannot be described as a veritable first issue of the book. The Matoaka portrait, which of course does not belong to the book, was re-engraved in modern days, and a copy of the re-engraving is inserted for the gratification of the purchaser.

- 1329 — another copy of the same, sm. folio, with engraved titles, 3 folding maps, and a portrait of the Duchess of Richmond engraved by WILLIAM PASSE; fine copy in old calf, with the autograph of C. Mildmay (about 1670) 1624 24 0 0

The engraved title is of the unaltered 1624 issue; the portrait is a rare early impression of 1623; but the map of New England is not here, and the other three maps are of the 1626-28 issue.—As for the portrait, it is difficult to decide whether Passe's or Delaram's was the one intended for issue with the book. They were both done in 1623 from the same picture, but Passe's is a three-quarter length, while Delaram's goes no further down than the waist.

- 1330 — THE GENERALL HISTORIE . . . to this present 1626 . . . Printed by I D and I. H for . Edward Blackmore Anno 1632. With Engraved title, 4 folding maps, and inserted facsimiles of the Delaram Duchess, and of the Matoaka portrait. 1632 Bound up with

THE TRUE TRAVELS, ADVENTYRES, AND OBSERVATIONS of Capitaine IOHN SMITH, in Europe, Asia, Africa, and America, from Anno Domini 1593. to 1629 . . . Together with a continuation of his generall History of Virginia, Summer-IIs, New England . . to this present 1629; as also of the new Plantations . . LONDON, Printed by J. H. for Thomas Slater . . 1630. With a large folding plate of Smith's adventures.

2 vols. in 1, small folio, in a seventeenth-century calf binding, with the initials N. T. on the sides, in sound and excellent condition 1630-32 32 0 0

The title of the Virginia is in its post-1626 condition, on which the bare head of Prince Charles was replaced by the crowned head of Carolus Rex. Three of the maps are of the same period, but the map of New England is not otherwise changed from its 1624 state, than by the substitution of "James Reeve" for "Geor. Low" as the printer.

- 1331 — The Generall Historie . . 1627—The True Travels . . 1630—2 vols. in 1, small folio, in calf gilt, with the royal arms of Charles I 1627-30 15 15 0

The engraved title of the Historie has the portrait of Prince Charles changed to that of Carolus Rex. The maps are missing, as well as the plate of The True Travels.

- 1332 — The True Travels, Adventures and Observations . . in Europe, Asia, Africke, and America, 2 vols. 8vo. portrait and plates; bds. uncut Richmond (U. S.), 1819 1 10 0

The plates are a facsimile from Smith's original books, and comprise his portrait, the design of his Adventures in compartments, and the maps of Virginia, and Old Virginia.

Spilbergen was a little earlier than Le Maire, and went through Magellan's Strait in his circumnavigation. He was at Jacatra when Le Maire's ship arrived there to be confiscated by the Dutch East India Company's officer; and consequently took Le Maire and his companions on board to carry them home with him. Le Maire died *en route*.

The account of Le Maire's voyage is given here as an appendix.

It was wisely produced in English, as there will no doubt be a large demand from the Australian colonies of England for a book in which the record of Tasman's labours is published and translated in its entirety for the first time.

Title; 8 preliminary leaves, paged 1-16; text, pp. 1-43; 1-18; a blank leaf; pp. 1-32; 1-20, 1-14, 1-8, and 1-16;—with folding map of *Australia* and *Tasman's Voyage*; folding map of the *Mississippi*; folding diagram to explain the discovery of *Ielmer* in the *Arctic* region; plate of a machine for marking the level; folding plate of the *Ephemera* marked *Tab. IV*; folding plate of a *Caterpillar* marked *Tab. III*; another plate marked *Fig. VI*.—These are all separate plates; other engravings (which are numbered in connexion with some of them) are printed on the text.

The map of the *Mississippi* and its tributaries, and the narrative of *Marquette* and *Jolliet's* expedition along it in 1673, appeared here for the first time, and give this little volume a peculiarly American interest. Its representation of *Tasman's Voyage* has been also, until the present day, the best authority upon that subject.

- 1422 ——— the same, a very large copy in the original calf gilt (broken) 1558 42 0 0
A long and gossippy description of *Villegagnon's* settlement (1555) on the *Rio*

Janeiro, to which Thevet himself gave the name of France Antarctique. It was abandoned after a few years, but Thevet quitted the colony in 1556 and went homewards by way of Newfoundland and Canada. There are 32 pages and some woodcuts devoted to Canada in this volume; and therefore the book ought to have been included by Harris as the second article in his Bibliography of Canada; being preceded only by Cartier's narratives. Thevet appears to have had conversations with Cartier on the subject of Canada.

The descriptions of the natives and their customs, and of the natural history of the region, are very ample and full of detail; and the woodcuts are of remarkable excellence. These were afterwards copied by De Bry.

- 1423 THEVET. - The first book in the English language relating to Canada. It is excessively rare, as we may conclude from the fact that there has been no copy in the market for nearly thirty years till this one turned up in the Ashburnham library. There was none in either the Barlowe or the Ives collection.
- COLLATION: * and A in fours; B—S in eights, and T in four leaves;—altogether 148 leaves, consisting of 8 preliminary leaves, 138 numbered leaves of text, and 2 leaves of Table.

The signatures are A—E and A—C in fours; D 2 leaves; * 4 leaves, A—II in fours, I two leaves. Some copies of the first book have a leaf of Approval or Imprimatur which is not here. This edition was printed by I. N. for *Hugh Perry*, and has on the title a woodcut of the two Pilgrims on a Giraffe.

His fellow-traveller was *John Burrell*. *Timberlake* himself was a ship-captain, who left his ship in the roads at *Alexandria* about the beginning of March 1601, landed, went to *Cairo*, from *Cairo* with a caravan to *Jerusalem*, saw there everything a good pilgrim could wish to see; went bark to *Cairo* in the charge of *Badawin*, made his way once more to *Alexandria*, and rejoined his vessel after an absence of fifty days from her. It is a curious and very interesting narrative.

RARE. The *Vinlandia* was the first book to give authoritative currency to the relation of the Norse Discovery of America. The book on *Greenland* was also a most important contribution to mediæval history; and its maps are very remarkable. One of them was designed in 1570, another in 1606, the third in 1640, the fourth in 1668, and the last by *Torfæus* himself.

One of the most important voyages ever made in the interests of geographical knowledge. Vancouver put an end to the old belief that the Subarctic seas in the direction of Greenland could be reached from Nootka Sound or any of the inlets in its vicinity.

He was accused (by reason of certain phrases in his History) of regarding as necessary the enslavement of the untamed Indians in Brazil. Here he answers his accuser, Senhor Lisboa, in a set of criticisms and essays which were intended to form part of the second edition of his history. As that second edition was not carried out this treatise on the Untamed Indians must be considered a necessary supplement to the first edition.—He thought that those Indians would never attain to even the lowest stage of civilisation, unless they were taken into forced tutelage by the State.

VERY RARE. THE FIRST AND ONLY CORRECT EDITION OF A FAMOUS BOOK OF EASTERN TRAVEL.

The Beckford copy, in dirty and unattractive condition, sold for £31.

A 6 leaves; B—Bb in fours. The leaves are numbered, but as 3 and 4 are skipped, and 5 is consequently marked iii, the error continues to the end, and the last leaf is marked C instead of Cii.

"This edition is the only one which gives Varthema's text truly . . It is of excessive rarity. Until recently, very few bibliographers were aware of its existence." This is the statement of the editor of the Hakluyt Society volume, giving a translation of Varthema.

He sailed from Venice to Egypt, saw Alexandria and Cairo, went to Syria, and in 1503 joined the caravan from Damascus through Medina to Mecca. He went through Yemen to Aden. Sailing from Aden for Persia, the vessel was thrown by a storm on the Abyssinian coast, but he sailed again and reached Ormuz, went through Khorassan into India, from Cambaya to Calicut and Tennasserim, thence to Bengal, thence to Burmah, Malacca, Sumatra, Borneo, Java, and back to Calicut; sailed in a Portuguese ship with Tristan d'Acunha to Mozambique and thence round the Cape to Lisbon which he reached in 1508.

- COLLATION: a—s in fours = 72 leaves in all.—This is a rare book with illustrations of considerable merit. The designer did not forget the amatory passages between the Italian and the Arabian Queen. Vartema resembled Beckford in some degree. Each had a high opinion of his personal attractions. In the Englishman's case it was the Queen of Portugal who was fascinated, according to his own account.

Under this the woodcut of a triangle. 4 leaves in Gothic letter, 42 lines to the full-page; with representations of two of the Southern constellations on the reverse of leaf 3 S. n. (1493) 180 0 0
- Among the rarest books in the world are the editions printed in 1493 of Vespucci's letter to his patron Lorenzo di Pietro dei Medici. The text they contain was written probably in October or November 1502, as we may judge from the statement that he had recently written about his return to Lisbon (Sept. 1502). Lorenzo di Pietro

had evidently wished for a full narrative of the voyage. Vespucci replies that the King held his papers, but he gives here a summary of the circumstances, mingled with references to his two voyages made in the Spanish service which preceded the one in question. There can hardly therefore be any doubt that he had gone twice to the New World, and returned, before he started on his third expedition in May 1501.

This excessively rare and important Epistle is bound up with the following:—Paesi nouamēte trouati . z No | no Mondo da Alberico Vespu | tio Florentino intitulado. *Beneath this intitulation is a large woodcut, white on black, which represents Vespucci kneeling before King Manoel, various figures of courtiers and soldiers around; the port of Lisbon with the returned ships in the background. On leaf 75b, above the woodcut mark of the Lignano brothers is the colophon: Stampato in Milano con la impēsa de Io. Iacobo & fratelli da Ligna | no: & diligente cura & industria de Ioanne Angelo scinzēzeler: nel. M.ccccxii . adi . xxyii . de Mazo. . .*

Sheets A-M in fours, and N three leaves. The first leaf of A is quite blank, the second is the title; on the third begins a continuous pagination which runs from 1-97. Down to page 92, the matter is precisely the same as in the T. S. edition; pp. 93-97 contain an Order of the Virginia Council dated 15 November 1620, which had not been promulgated at the time when the T. S. edition was printed.

The work begins with the Declaration of the Council 22 June 1620; then follows a Note of the Shipping, Men, and provisions sent out in 1619; a Declaration of the intended Supplies, 18 July 1620; Names of the Adventurers, with their several summes aduentured paid to Sir Thomas Smith; two other lists with the sums paid to Sir Baptist Hicks and Sir Edwin Sandys; Orders and Constitutions 1619-20 in 132 paragraphs. So far the two editions agree: the succeeding five pages in the Snodham copy were additional there.

- 1614 ——— another copy, *the map in facsimile, old red morocco gilt* 1558 4 0 0
The value of the map lies in the circumstance that the Zeno who published the book declares that the original was lying among the old family papers, and that it professes to be the chart of the navigation of the two brothers northward in 1380. As the most westerly land delineated in it is marked Estotiland, and that this name was frequently applied to Labrador in the sixteenth century, the Zeno map has for three centuries ranked among Americana.
The Beckford copy fetched £50; the Hamilton copy £38.

It thus belongs to the class of American cartography. In the text referring to it there is a mention of <i>Antonius Cabot's</i> voyage, and of imminent Spanish expeditions to the North-East of the New Continent. The book is dedicated to the French princess Renée, Duchess of Ferrara. The map of Schondia has been reproduced by Nordenskjöld. | | | |

The Spanish-Mexican part ends on fol. 62; fol. 63 is blank; 64 is the title of the Mexican-Spanish part. Fol. 79b: . . FIN. 2 parts in 1 vol. 12mo. 96 leaves printed in Roman and Italic letter; <i>old calf gilt</i> <i>Mexico (1611)</i> This is clearly the first edition of Arenas' Vocabulary, although the book itself	10	0	0

shows no date of impression. The only date given is that of the Viceroy's licence to print, which follows the title, and is marked 21 January, 1611.

There are twelve quires in the book: the first unsigned, the others signed A-L, all in eights. There is a pagination which begins on fol. 9, ends on fol. 96; extending from pp. 1-108, then skipping the blank leaf begins *again on the second title* with 109, then missing the reverse of that title, begins with p. 110 on the obverse of leaf 65; and proceeds to 159 on the reverse of leaf 89. The remaining seven leaves are paged 170-183.

At the end is bound up a book printed at Oxford in 1586: *Summa et Synopsis Novi Testamenti distichis . . comprehensa.*

VERY RARE. The Fischer copy is apparently the only other copy—and that a bad one, wanting the two leaves of Index—which has hitherto turned up in the London market.
Three old Mexican prints of the seventeenth century are inserted loosely.

The Ramirez copy, imperfect, fetched £38. 10s. The present copy of this excessively rare book wants leaves 12-14 and 16-20 of the first part; and 1-11, 15, 56, 57, 64, and 96 of the second part.

The contents of this volume can easily be recognized and divided into two parts:
I. An extensive CONFESSARIO, consisting of thirty-four leaves, including six blank.
II. A collection of Sermons and religious instructions, occupying one hundred and ninety leaves, of which sixteen are blank.
On one of the blank leaves we read 'al Pe. Oracio Carochi,' which seems to intimate that the MS. belonged to him."
This MS. fetched £15. 15s at the Ramirez sale. | | | |
| 1691 | MANUSCRITOS EN MEXICANO. A volume in folio, containing fourteen original pieces in MS. and three printed ones; the MSS. occupying two hundred and six leaves; <i>hf. bd.</i> 1580-1847 | 18 | 0 | 0 |
| | AN INTERESTING and VALUABLE COLLECTION chiefly of official papers in cases of legal process, etc., but including also three Miracle-Plays (Las Almas y las Albacéas, El Nacimiento de Ysaac; S. Elena y la Santa Cruz) of the seventeenth century, in Mexican with Spanish translations. One document of remarkable interest is a beautifully written Mexican letter or protest addressed by the notables of Mexico, Tezcuco, etc. to Philip II. The blank space above the text on p. 1 is filled with a long account by one of the monks at whose request it had been prepared for transmission to the King, after passing through the hands of Miguel Navarro, Geronimo Mendieta, and Alonso de Molina. It failed to reach the monarch, and the kindly monk says bitterly "Bien se colige de aquí como estos nuestros hijos son inayudables." A modern Spanish translation is added. There are further the two printed documents, of which one is a Proclamation in Mexican and Spanish, signed F. S. Tepca, dated Toluca, Sept. 25, 1847, in which he calls upon the Indians to rise against the North American invader: <i>a single sheet broadside.</i> "Nosotros estamos destinados á ser presa del infernal Yanquee." | | | |
| 1692 | MAXIMO PAQUIL titie Yn Haso mahuis . . <i>a Religious tract in Nahuatl</i> , sm. 4to. MS. of 20 leaves, written by a Mexican hand on paper, with coloured and illuminated borders chiefly of floral pattern, but inclosing various figures of cherubs, etc., a remarkable example of native decorative work Mexico, about 1630 | 7 | 10 | 0 |
| 1693 | SAHAGUN (Bernardino de) Sermones en Mexicano, folio, neatly written, Original Manuscript on paper made by the Indians from the Agave, such as they used before the discovery of their country by the Spaniards, 98 leaves, <i>bd. from the Ramirez collection, in red morocco case</i> Mexico, 1540-50 | 200 | 0 | 0 |

On the first page it has the following title in the handwriting of Father Sahagun, the lower half of which is torn away:—

"Siguense unos sermones de dominicas y de sanctos en lengua Mexicana: no trazudidos de sermonario alguno sino compuestos nuevamente a la medida de la capacidad de los Indios: breves en materia y en language congruo venusto y llano facil de entender para todos los que le oyeren altos y baxos principales y macegolas, hombres y mugeres. Compusieronse el año de 1540; anse comenzado a corregir y añadir este ano de 1563, en este mes de Julio infra octavam Visitationis. . . . fray bnardio. de Sahagun." Some pages are absent at the beginning, and a few pages further on we meet with another note in the handwriting of Father Sahagun:—"Siguense unos sermones breves on

la lengua Mexicana : fray bnardio. de Sahagun." It should be remarked here that the imperfections, whatever they may be, are not of recent origin; the book seems to be now precisely as it was when Sahagun began to revise it and wrote the headings I now quote.

On folio 91, the dominical sermons conclude with another note in Mexican in Father Sahagun's handwriting, and signed by him; then succeeds a blank leaf, and on the following commences a "Sanctoral" on six leaves, the end wanting. This MS. is undoubtedly one of the most curious and interesting volumes in the Mexican language ever offered for sale. In his knowledge of the Aztec language and literature, Sahagun has probably never had an equal. The historical work which he wrote concerning the Mexican empire, and which has been published by Bustamente, brought down upon him the abuse of his fellows, both lay and clerical, for aiding, as they said, to perpetuate the idolatry of the nation.

- 1694 SAHAGUN. *Exercicios quotidianos en lengua Mexicana*, sm. 4to. *MS. plainly written*, 86 pp., *sd.* UNIQUE Mexico, 1574 (—1590) 7 7 0
- The MS. begins thus:—"Comienza un exercicio en lengua Mexicana, sacado del sancto Evangelio y distribuido por todos los dias de la semana . . ." At the end, there is the inscription: "Este exercicio halle entre los yndios, no se quien se le dio; tenia muchas faltas e incongruidades. Mas con verdad se puede dezir que se hizo de nuevo que no que se emendo. Este año de 1574, fray Bernardino de Sahagun."
- The MS. is in perfect preservation, and the handwriting is clear and legible—in fact, too boldly written to be anything but a copy of the autograph of Sahagun. It is probably identical with the single MS. of the work which is mentioned by Beristain as being in his time in the College of St. Gregory at Mexico, and which he seems to have considered the original, just as Ramirez believed this to be. This MS. is described by Icazbalceta.
- 1695 SAHAGUN, POSTILLA (wrongly called by Icazbalceta *Doctrina Christiana*) *Nican vnpeoa ynnemachtiliztlatolli . . ynitoca Virtudes Theologales . . Oquichuih fray Bernardino de Sahagun . .*

- The description given by Ramirez, and by Icazbalceta (in his *Bibliografía*, p. 266) is incorrect. The contents of the volume are two copies of the "Veynte y seis Adiciones desta Postilla," but the one copy which is numbered ends with the Twenty-fourth, while the other which is unnumbered has Twenty-seven. The MS. is however unique, notwithstanding that it comprises two copies of one work.

- Printed with characters invented to represent certain sounds of the language. The text is preceded by an essay on the use of this alphabet.
- COLLATION: 9 preliminary leaves; 80 pp. of text; and a folded table which is an Epitome of the book. It was considered so important that the language should be acquired, and so difficult to do it, that the Archbishop of Mexico offered eighty days' indulgence to any one who mastered either the text or the Epitome.—The reverse of

the eighth preliminary leaf bears the heading *Fe de Erratas*, but the list of errors beneath it was cancelled by pasting blank paper over it. The ninth leaf was substituted and is more ample, containing an *Errata* of two pages. HITHERTO UNKNOWN. There is a hint in Ludewig of the existence of an edition of *Torres Rubio*, printed at Seville in 1603 : he had no doubt heard of the preceding anonymous book and supposed it to be a *Torres Rubio*. This work has been in fact known only through the edition of Lima, 1614, which is always described under the name of the printer, Francisco del Canto, and supposed to be his own production. The author was in Seville at the time of printing, but must have previously been in Peru to learn the language. He speaks of the study of the language as being the best occupation for *yo y mis compañeros* on the voyage out.

A slightly altered reprint of the Seville book of 1603. The preface "al Letor" is signed by Francisco del Canto, and contains the words, "He hecho este Vocabulario", which have hitherto been taken as sufficient warrant for assigning the authorship of the work to him. Although he had already in 1607-8 printed Holguin's quarto Dictionary and Grammar, he reprinted this older anonymous work in 1614 as a cheaper and handier work for common use, but, notwithstanding the words "he hecho," he can hardly have been ignorant of its true authorship.
